

DICKSON COUNTY SCHOOL DISTRICT

Every Student Every Day

K – 8 Math Printable Options on Dickson County Schools Website Guidance for Parents and Students

OPTIONAL AT-HOME ACTIVITY PACKETS

- This is NOT the packet that elementary students (K-5) will receive upon request from the central office. Elementary students will receive an enhanced version of the Math Parent/Student Interaction Guide that is ten pages in total length.
- Each grade level (K-8) has an At-Home Activity Packet that includes sets of practice problems that align to grade level concepts your student has worked with so far this year. There is an Answer Key for each Activity Packet for students and families to check work.
- These do not have to be printed. Save the document on a device to open without internet. Students can work the problems on their own paper.
- The recommendation is for students to complete one page of practice problems each day. Our goal is for students to continue developing their mathematical fluency and skills around addition, subtraction, multiplication, and division that are appropriate to their grade level. If students find themselves struggling or are unsure of what to do, having the answers is a great resource. Knowing the correct answer allows students to “work backwards” and discover their own solution path – there are usually several solution paths to every problem!

OPTIONAL SPIRAL ACTIVITIES FOR MATH

- These activities are a hands-on approach to review key topics already taught this year. These contain activities students can do by themselves or with partners and includes most if not all materials needed. (You might need a deck of cards or dice for some activities.) There are directions for each activity. There is an answer key to check work.
- These do not have to be printed. Save the document on a device to open without internet. Students can work through the activities on their own paper. For matching or sorting activities, students can create their own version using paper, index cards, post it notes, etc.
