## INTRODUCTION

The Dickson County High School Registration Guide contains information regarding course offerings, recommended course sequence, policies, requirements, and services. This information has been prepared to enable students and parents to make informed career decisions and to prepare for the lifelong career decisionmaking process. Course offerings are contingent on the number of students registering for a course, budget considerations, and teacher assignments.

A strong high school background is essential for continued success in the workplace or in post-secondary studies. In selecting a curriculum, students should recognize that employment and college admissions are highly competitive. Rigor of curriculum, grade-point average, class rank, attendance, and standardized test scores are crucial factors in decisions made by employers and college admissions personnel. Therefore, it is advantageous for students to select a challenging curriculum consistent with career goals and postsecondary plans.

It is the policy of the Dickson County Board of Education not to discriminate on the basis of sex, race, national origin, creed, age, marital status, or disability in its educational programs, activities, or employment policies as required by Title VI and VII of the 1964 Civil Rights Act, Title IX of the 1972 Education Amendments, and Section 504 of the Federal Rehabilitation Act of 1973.

## HIGH SCHOOL VOCABULARY

ACT: A college-entrance exam which is required by most two- and four-year colleges (American College Testing)
Alternative Courses: Courses the student lists during course request process in your first-choice selection is not available. You should list courses you would be willing to take in event there is a schedule conflict. List four or more back-up course options.
CCR: College and Career Readiness

Class Rank: The order of students in relation to classmates based upon numerical averages
Core Curriculum Course: Basic courses required of all students for graduation
Course Catalog: A booklet that explains graduation requirements, registration policies, and course descriptions to assist students and parents in the selection of courses
Credit: The value assigned to a course upon successful completion (also called unit)
Curriculum: A school's course of study
Elective Course: A course a student chooses after selection of required courses.
EPSO: Early Post-Secondary Opportunities
GPA: The averages of final grades (grade-point average)
Honors Course: A challenging curriculum requiring additional outside projects and/or readings
NCAA: An association that regulates college athletic programs by establishing rules on eligibility, recruiting, and financial aid (National Collegiate Athletic Association)
NCAA Clearinghouse: A process completed by students planning to participate in Division I or II athletics during college
Program of Studies (POS): A combination of selected programs designed to equip students with work and life skills in a specific area.
Pre-requisite: Successful completion of a subject prior to enrolling in a course (i.e. Spanish I before Spanish II)
Quarter: One half of the semester or nine weeks of the school year
Ready Graduate Indicator: The Ready Graduate indicator is a new accountability metric in Tennessee's Every Student Succeeds Act (ESSA) plan and is aligned to the goals in the department's strategic plan, Tennessee Succeeds. The Ready Graduate indicator measures the percentage of students who earn a diploma from a Tennessee high school and meet success milestones that increase their probability of seamlessly enrolling in postsecondary education and securing high-quality employment.
Registration: The process of selecting courses for the next school year
Required Course: A course essential for graduation
SAT: An entrance exam which is required by some colleges and universities (Scholastic Aptitude Test)
Semester: One half of the school year on a seven period schedule
TISA: Tennessee Investment in Student Achievement Formula
Transcript: A record of subjects, grades, test scores, and, attendance high school
Unit: The value assigned to a course upon successful completions (also called credit)

## Skyward Information

## Skyward Family \& Student Access Overview

Dickson County High School is dedicated towards helping all parents and guardians to be easily involved with their child's educational team. In our ongoing effort to increase communication between school and home, we are pleased to offer Skyward Family Access to our families. Skyward is our statewide student information system, and all families have access to the system. With this online ability, you will be able to view your child's schedule, daily attendance, quarter/semester grades and grade books, and general and emergency information. The information is on a secure server, and you will access the information using a unique login and password. Your Family Access login will work for all children who live in your household, regardless of grade level or school of attendance. Please contact your child's school for instructions on how to obtain your login.

## Skyward Frequently Asked Questions

## How do I get access to Skyward Family Access?

Your student's school sets up access at time of enrollment. If you do not remember how to access your account, please contact your school.

Do I need a separate account for each child? Can I see student information for children attending? You will have one account that gives you access to all of your children attending school within this district.

Are passwords case sensitive?
Yes, passwords are case sensitive.

## Can I change my password?

Yes, you will have the option to change your password once you login to Skyward Family Access.

## What if I forget my password?

Go to the Skyward Family Access log in page and click on "Forgot Login/Password" link. You will receive an email with your username and a link for your password. Please follow the directions in the email to reset your password.

## Will I need to sign up for Skyward Family Access every year?

No, once you have an active account it will remain active as long as you have a student enrolled.

## Can/should I share my password with my student?

No, parents and students have different passwords because they have different types of access. Students have their own Student Access account (login will be provided by the school). Skyward Family Access is password and user name protected. PLEASE KEEP YOUR PASSWORD AND USER NAME CONFIDENTIAL.

Is there a free mobile app for Skyward Family Access?
Yes, Skyward has a free mobile app available on all major platforms, including iOS, Android and Windows Mobile.

Family Access User Guide

## SCHEDULING POLICIES

Our Course Request Process for the upcoming school year begins in the spring semester. Our Master Schedule is based on the requests submitted during this spring process. The spring registration determines the courses the school will offer the following fall. Once the Master Schedule has been created class scheduled are created for students. Students are obligated to take the courses they requested. Students, therefore, should plan their schedules in a thoughtful, careful manner to match their abilities and educational goals. Once next school year starts schedule changes are mainly limited to schedule corrections.

- Students must request enough courses to cover 7 periods of the school day.
- $\mathbf{9}^{\text {th }}$ Grade Placement: $9^{\text {th }}$ Grade students will be placed into core classes with the following procedures: using test data and teacher recommendations. Parents and students who disagree with the recommended placement and would prefer their student take a higher or lower level class can request this at the time of course selections.
- $4^{\text {th }}$ Year Math: A student must be enrolled for credit in a math course through the senior year even if four credits in math have already been earned.
- After Requesting Courses: After requesting courses and before the end of the current school year, each student shall receive a course verification form, which shows the courses they selected. Parents and students are asked to review and make any changes or corrections then sign and return the form by the stated deadline, March 19, 2024. This is your Mind Change Deadline!
- Change Request Form Deadline: Students can change their mind, complete a change request form and turn it in before March 19, 2024. Absolutely, no change request will be accepted after March 19, 2024.
- The Only Changes Allowed in August: The only valid schedule corrections will be to update course selections based on summer school credits or to correct a scheduling error made by the school and take place the within the first 10 days of school.
- No Dropping in Level: Students who requested Advanced Level courses in the spring will be obligated to take these courses in the fall. Students may not drop a course or level because they have changed their minds, did not do the summer reading/assignments, or desire a different teacher.
- Request for Specific Teacher: A student may not request a transfer from one teacher to another or request to have a specific teacher.
- Students cannot Request E-Lab/Edgenuity Courses: E-Lab/Edgenuity courses are primarily for Credit Recovery.
- Full Year Courses: Full-year courses last for the full year and may not be dropped at the end of the first semester, even if the course does not fulfill a core requirement. The usual consideration is whether the student has been academically misplaced.
- Problems with a Class: A student who is experiencing problems in a class will not be removed from the class. When problems develop, the following procedures should be followed:

1. The students should consult the teacher for ways to improve.
2. The student is expected to engage in the solutions offered by the course instructor. This may include but is not limited to one-to-one tutoring with the teacher, small group tutoring offered before or after school or additional remediation projects.
3. If the problem still exists, the parent should talk to the teacher. Conversation can occur over the phone or through e-mail, but the best communication is person to person.
4. If the problem continues to exist, the parent can request a school meeting that includes the teacher, the student, the parent(s), the appropriate school counselor, and the grade-level assistant principal. The team will form a plan of action.

## TENNESSEE DIPLOMA PROJECT

The purpose of the Tennessee Diploma Project is to align our curriculum to make sure we give students, parents and teachers a pathway to reach those high standards. We want to make sure that our tests and graduation requirements reflect that our students really are prepared for workforce training or college.

The goal is to build stakeholder support for raising education standards. Both higher education and the business community play key roles. These groups feel that graduates need:

- Stronger math and science skills, but especially mastery of basic math; in addition, post-secondary school or work requires that students be able to think critically toward a focused solution.
- Stronger communication skills, including both verbal skills and writing skills.
- To be able to work in teams to solve real world problems
- To be able to think, apply, and use what they know
- To have a strong work ethic; be at work regularly and be on time

## STATE OF TENNESSEE GRADUATION REQUIREMENTS

All State of Tennessee and Dickson County High School graduation requirements must be completed in order to participate in commencement exercises. To meet state and local requirements for graduation, all students shall have attained an approved attendance, conduct, and subject matter record which covers a planned program of education. As a strategy for assessing student readiness for post-secondary education, every student enrolled in a Tennessee public school during their eleventh (11th) grade year shall take either the ACT or SAT. All students enrolled in a Tennessee public high school must take the United States Civics Test. These test must be taken to be awarded a diploma.
*Students shall be required to achieve, by the time they graduate, at least the following: Algebra I, Geometry, and Algebra II (or the equivalents) plus one additional mathematics course beyond Algebra
I. All students will be enrolled in a math class each year. Students with qualifying disabilities as documented in the individualized education program shall be required to achieve at least Algebra I and Geometry (or the equivalent).
** Students shall be required to achieve, by the time they graduate, at least Biology I and either Chemistry or Physics plus another laboratory science. Students with qualifying disabilities as documented in the individualized education program shall be required to achieve at least Biology IA, Biology IB, and one other lab science credit. The required number of credits in science will be achieved through strategies such as, but not limited to, increased time, appropriate methodologies, and accommodations as determined by the IEP team.
***The social studies curriculum shall include United States History, World History/World Geography, Economics, and Government.
****In exceptional circumstances, schools may waive the world language and fine art requirement for students who are not planning to attend a university. Students must expand and enhance their elective focus.

## HIGH SCHOOL DIPLOMA

The high school diploma will be awarded to students who (1) earn the specified 22 units of credit, (2) Satisfy the ACT \& Citizenship Test Requirements and (3) have satisfactory records of attendance and conduct. Beginning with the Class of 2028, all students will be required to complete a computer science credit as one of their 22 credits required to graduate.

| Math * | 4 credits including Algebra I and II, Geometry or its equivalent, and a fourth higher level course |
| :---: | :---: |
| Science ** | 3 credits including Biology, Chemistry, or Physics, and a third lab course |
| English | 4 credits |
| Social Studies *** | 3 credits |
| Physical Education \& Wellness | 1.5 credits |
| Personal Finance | 0.5 credits |
| Foreign Language ${ }^{* * * *}$ | 2 credits |
| Fine Arts **** | 1 credit |
| Focus Area | 3 credits |
| Total Credits | 22 credits |

## OTHER DIPLOMAS

1. A diploma of Specialized Education may be awarded to students with disabilities at the end of their fourth year of high school, who (1) have not met the requirements for a high school diploma, (2) have satisfactorily completed an individualized education program, and (3) have satisfactory records of attendance and conduct. Students who obtain the special education diploma may continue to work towards the high school diploma through the end of the school year in which they turn twenty-two years old.
2. Beginning with students entering the ninth (9th ) grade in 2018, an alternate academic diploma may be awarded to students with the most significant cognitive disabilities at the end of their fourth (4th ) year of high school who have (1) participated in the high school alternate assessments; (2) earned the prescribed twenty-two (22) credit minimum; (3) received special education services or supports and made satisfactory progress on an IEP; (4) have satisfactory records of attendance and conduct; and (5) have completed a transition assessment(s) that measures, at a minimum, postsecondary education and
training, employment, independent living, and community involvement. The required credits may be earned either through the state-approved standards or through alternate academic diploma course requirements defined by the Department of Education. A student who earns an alternate academic diploma shall continue to be eligible for special education services under IDEA until the student receives a traditional high school diploma or through the school year in which the student turns twenty-two (22).
3. An occupational diploma may be awarded to students with disabilities at the end of their fourth year of high school who have (1) not met the requirements for a high school diploma, (2) have satisfactorily completed an individualized education program, (3) have satisfactory records of attendance and conduct, (4) have completed the occupational diploma Skills, Knowledge, and Experience Mastery Assessment (SKEMA) created by the Tennessee Department of Education, and (5) have completed two (2) years of paid or non-paid work experience. The determination that an occupational diploma is the goal for a student with a disability will be made at the conclusion of the student's tenth (10th) grade year or two (2) academic years prior to the expected graduation date. Students who obtain the occupational diploma may continue to work towards the high school diploma through the end of the school year in which they turn twenty-two (22) years old.

## READY GRADUATE

The "Every Student Succeeds Act" (ESSA) requires reporting of an indicator to predict high school graduate performance in post-secondary training or the workforce. This indicator should represent proficiency beyond academics. The TN Ready Graduate indicator represents a holistic, wellrounded education, and to meet this requirement, students must fulfill at least one of the following criteria:

- Earn a composite score of 21 or higher on the ACT (or 1060 or higher on the SAT)
- Complete four early post-secondary opportunities (EPSOs)
- Complete two EPSOs + earn an industry certification
- Complete two EPSOs + earn a score of military readiness, 31 or higher, on the Armed Services Vocational Aptitude Battery (ASVAB) Armed Forces Qualifying Test (AFQT)

## GRADUATION WITH HONORS/DISTINCTION

1. Graduate with Honors: Students who score at or above all of their subject readiness benchmarks on the ACT will graduate with honors. The benchmark set for each test is English-18, Math-22, Reading-22, and Science-23. Students must have a 3.0 GPA.
2. Graduate with Distinction: Students will be recognized by attaining a B average and completing at least one of the following:

- Earn a nationally recognized industry certification.
- Participate in at least one of the Governor's Schools.
- Participate in one of the state's All State musical organizations.
- Be selected as a National Merit Finalist of Semi-Finalist
- Attain a score of 31 or higher composite score on the ACT
- Attain a score of 3 or higher on at least two advanced placement exams.
- Successfully complete the International Baccalaureate Diploma Program.
- Earn 12 or more semester hours of transcripted post-secondary credit.

## PROGRAM OF STUDY - FOCUS AREAS

*Some courses count as a core graduation requirement or focus area - but not both.

| Humanities Program of Study Course Offerings |  |  |
| :---: | :---: | :---: |
| Contemporary Issues | French III Honors | Sociology (1/2) |
| Creative Writing | Psychology | Spanish III Honors |
| Competitive Speech \& Debate | Psychology DE | Speech Communication DE |

Fine Arts Program of Study Course Offerings
If Fine Arts Focus, Area students must earn at least 4 Fine Arts Credits.

3D Art
Advanced 3D Art
Advanced Theatre
Band (10-12)
Choral Music (10-12)

Commercial Design ( $1 / 2 \mathrm{cr}$ )
General Music*
Music History*
Mixed Media ( $1 / 2 \mathrm{cr}$ )
Theatre I*

Visual Arts I*
Visual Arts II
Visual Arts III/IV

Career and Technical Course Offerings - Select 1 Program of Study

Agriculture - Select 1 Program of Study
Agricultural Engineering and Applied Technologies
Horticulture Science
Veterinary \& Animal Science
Architecture \& Construction - Select 1 Program of Study
Architectural \& Engineering Design (CAD)
Residential \& Commercial Construction Technology
Arts, A/V Technology \& Communication
Digital Arts \& Design
Business Management \& Administration
Business Management
Education and Training
Teaching as a Profession K-12

Health Science - Select 1 Program of Study
Nursing Services
Therapeutic Services
Human Services
Dietetics \& Nutrition
Law, Public Safety, Corrections \& Security Program
Law Enforcement Services
Science, Technology, Engineering \& Math (STEM)
Technology
Transportation, Distribution, \& Logistics
Automotive Maintenance and Light Repair

## INDIVIDUALIZED INSTRUCTION

In an attempt to meet the individual needs of pupils, Dickson County High School offers elective courses in art, business, language arts, world languages, mathematics, music, physical education, science, social studies, and career/technical subjects. Some courses offered in English, mathematics, science, and social studies are offered on an advanced level.
DCHS is committed to helping all children succeed. We have many ways to help children who are struggling to learn and who need additional supports to be successful. Response to Instruction and Intervention ( $\mathrm{RTI}^{2}$ ) is one form of support.

## What is RTI?

A multi-tiered delivery system that uses a data-driven problem-solving model to identify specific student need and match appropriate instructional strategies.

In Tennessee, the Response to Instruction and Intervention ( $\mathrm{RTI}^{2}$ ) Framework is a component of TNCORE. The TNCORE implementation plan has three legs with student achievement at the center:

- Assessment alignment and transparency
- Instructional materials and curriculum
- Quality training and meaningful support

## CREDIT RECOVERY INFORMATION

## What is a Credit Recovery Course?

It is a course the student has previously taken, earning a final grade falling between 50 and 59 or did not earn credit for other reasons (attendance).

Credit Recovery is a program to enable students to complete unearned credit through an independent, self-directed online learning environment.

## Eligibility

- Open to any student in grades $10-12$
- Must have written consent from guardian.
- Must meet with your school counselor to develop a detailed graduation plan.
- Credit Recovery Enrollment is not guaranteed; your counselor may enroll you back in a traditional classroom to repeat the failed course.

## Credit Recovery Goals

- Stay on track to graduate on time with your class.
- Avoid falling further behind on satisfying your graduation requirements.
- Avoid the need to attend summer school.
- Complete the failed course within the time frame outlined by the school.

## Grading

- The original grade will remain on your transcript.
- The state board of education requires that completed Credit Recovery Courses receive a final grade of 60 .
- The Credit Recovery course grade will be added to your transcript.

## About Edgenuity Online Courses

Edgenuity's direct-instruction videos feature expert, on-screen teachers who explain concepts, model strategies, provide examples, and make real-world connections. Students stop to complete tasks that check for understanding. Students can pause or rewind videos to take notes or review concepts as they progress through instruction at their own pace.

## Credit + Concept Recovery

Self-paced learning and pretesting allow students to spend more time on what they need and less time on content they've already mastered so students can catch up and graduate on time.
Note: Not all colleges/universities accept credit recovery course credits. The NCAA may not accept credit recovery courses for eligibility course credits.

## STATE REQUIRED EXAMINATIONS

1. TN Ready testing will be conducted for students who are enrolled in the following courses, English I, English II, Biology I, Algebra I, Algebra II, Geometry and US History. At press time of this bulletin, Dickson County Board of Education policy had not been set for the \% that TN Ready assessments will calculate into a student's grade for these courses.
2. Other state mandated testing includes: ACT ( $11^{\text {th }}$ grade) and Civics Test

As a strategy for assessing student readiness for post-secondary education, every student enrolled in a Tennessee public school during their eleventh (11th) grade year shall take either the ACT or SAT. To receive a regular high school diploma, all students enrolled in a Tennessee public school during their eleventh (11th) grade year must take either the ACT or SAT. The Civics test is taken through U.S. Government/Civics or JROTC III.

## RECOMMENDATION FOR ENROLLMENT IN ADVANCED COURSES

When students are registering for the second or next level of a course the following guidelines are strongly recommended:

## If the grade in the first level or prerequisite course is

A or $\mathbf{B}$, the next level is strongly recommended.
C, the next level is recommended with reservations.
D, the next level is strongly discouraged since needed skills for more advanced study in that area may be lacking.

## Advanced Course Offering Include:

- Honors level - 3 rigor points
- Dual Credit - 3 rigor points
- Dual Enrollment - 4 rigor points
- Advanced Placement - 5 rigor points

Honors Courses Offerings

| English | Math | Science | Social Studies | World Language |
| :--- | :--- | :--- | :--- | :--- |
| English I | Geometry | Biology I | World History \& Geography | French I |
| English II | Algebra II | Chemistry | U.S. Government | French II |
| English III |  | Physics | Economics | Spanish I |
| English IV |  |  | U.S. History | Spanish II |
|  |  |  |  | Spanish III |

## EARLY POST-SECONDARY OPPORTUNITIES (EPSOS) FOR 2024-2025

Early post-secondary opportunities (EPSOs) include a course and/or exam that give students a chance to obtain post-secondary credit while still in high school. Courses (whether stand-alone or in conjunction with an exam for post-secondary credit) must be aligned to post-secondary standards.

Early post-secondary opportunities allow students to:

- Earn post-secondary credits while in high school.
- Become familiar with post-secondary rigor and expectations.

- Develop confidence and skills for success in post-secondary learning.
- Make informed post-secondary and career decisions.
- Decrease the time and cost of completing a certificate or degree.

Early postsecondary opportunities (EPSOs) include a course and/or exam that give students a chance to obtain postsecondary credit while still in high school.

## Early postsecondary opportunities allow students to:

- Earn postsecondary credits while in high school.
- Become familiar with postsecondary rigor and expectations.
- Develop confidence and skills for success in postsecondary learning.
- Make informed postsecondary and career decisions.
- Decrease the time and cost of completing a certificate or degree.

## Advanced Placement

AP Biology
AP Environment Science

## Dual Enrollment

APSU Dual Enrollment Collaborative (visit www.apsu.edu/govnow for info and course offerings)
English Comp I - (Eng 1010) - NSCC
English Comp II - (Eng 1020) - NSCC
Pre-Calculus - Trigonometry - (Math 1720) - NSCC
Probability and Statistics - (Math 1510) - NSCC
Pre-Calculus Algebra - (Math 1710) - NSCC
Calculus- (Math 1910) - APSU
Early US History I- (Hist 2010) - APSU
Modern US History - (Hist 2020) - APSU
Intro to Psychology - (Psyc 1030) - NSCC
Automotive Maintenance and Light Repair - TCAT Dickson
Residential \& Commercial Construction - TCAT Dickson
Architectural \& Engineering Design (CAD) - TCAT Dickson
Criminal Justice - (CRMJ 1010) - NSCC
Intro to Legal Process - (CRMJ 1020) - NSCC
On Site Classes - TCAT Dickson
HVAC - Early Technical College - TCAT Dickson
Digital Arts - TCAT Dickson
Pre-Nursing - @ TCAT-Dickson - Not offered 2024-2025
Teaching as a Profession II - APSU (5 credit hours possible)
Biology - (Bio 1010) - NSCC
Fundamentals of Speech Communication - (Comm 2045) - NSCC

## Statewide Dual Credit

Introductory Statistics

## Local Dual Credit

Intro to Criminal Justice - (CRMJ-1010DC) - NSCC
Criminal Investigation - (CRMJ-1340DC) - NSCC
Intro to Crime Scene Investigation - (CRMJ-1360DC) - NSCC
Auto Desk Inventor (with passage of Autodesk Inventor Certified User Certification) - (CAD 2113) NSCC
Intro to Animal \& Veterinary Science - (ANSC 1410) - MTSU
Industry Certifications (may vary due to student interest and local or federal grant money)
Agriculture - Commercial Pesticide (18+)
Architecture \& Construction - NCCER Core Curriculum, NCCER Construction Technology, OSHA 10

Automotive Maintenance and Light Repair - Automotive Service Excellence Entry Level Maintenance and Light Repair Certification (ASE), Snap-On Tire Pressure Management System (TPMS), Snap-On 535F Multimeters, Snap-On Electric/Mechanical Torque, Snap-On Batteries/Starting \& Charging, Snap-On Tool ID, OSHA 10, 609A-AC Certification (real world certification)<br>Business Management \& Administration - MOS Word Associate, PowerPoint, and Excel<br>CAD - Autodesk AutoCAD, Autodesk Revit<br>Criminal Justice - FEMA 100 ICS Certification, Intro to the Incident Command System, E911 Basic Telecommunications Certification<br>Digital Arts \& Design - Adobe Certified Professional - (Illustrator), (InDesign), (Photoshop)<br>Health Science - Certified Clinical Medical Assistant, Certified Patient Care Technician<br>Human Services - ServSafe Food Handler<br>STEM - Autodesk Inventor Certified User

## ADVANCED PLACEMENT (AP)

Advanced Placement (AP), apstudents.collegeboard.org, classes are high school classes in which a student may test for college credit. Tests are given in May after coursework completion. Scores range from 1-5 and each college has its own rules about which score provides college credit (e.g. - Columbia State may accept a 3 or higher to earn credit for the course, whereas UTK would only accept a 4 or higher). Students should challenge themselves to take, and succeed, in an AP class as it is an excellent opportunity to expand your knowledge AND get credit for a college class.

## AP Benefits

- Students learn rigorous college-level content and skills
- Taking AP is valued in the college admission process
- AP courses are interesting and rewarding academic experiences
- Opportunity to earn valuable credit and placement in college

## Parent Tips for AP Program

Did your child take the PSAT/NMSQT®? Performance on this test can be an indicator of success in specific AP courses. Talk to your child's counselor for details or go to https://collegeboard.org/quickstart. It's never too early to start thinking about and planning for AP. Students can consider taking AP throughout high school, but it's never too early to start the process. There may be honors-level courses or other academic opportunities that can start a student on the road to AP. You can talk to your child's counselor to map out a course plan.

## AP Program Myth and Realities

| Myth | Reality |
| :--- | :--- |
| AP courses are for students who always <br> get good grades. | AP courses are for any students who are academically prepared <br> and motivated to take college-level courses. Taking AP is valued in <br> the college admission process |
| AP courses are too stressful. | It's no secret that AP courses are challenging. But the support you <br> receive from your classmates and teachers can help you manage <br> the workload. |
| I don't think I will score high enough on <br> the AP Exam to get college credit. | You don't need to score a 5. Many colleges grant credit - and <br> placement as well - based on a 3 or higher on an AP Exam. |

| Taking AP courses could hurt my GPA. | Your quarter grades, mid-term exam and final exam grade receive <br> five (5) Rigor Points. Taking AP courses shows colleges that <br> you're willing to challenge yourself academically. |
| :--- | :--- |
| I can't take AP because no one has <br> recommended me. | If you think you're ready to take an AP course, then you're ready <br> to advocate for yourself - just talk to a teacher or counselor. |

## Financial help for AP Exams is available

AP Exam fees for 2024-2025 are approximately $\$ 100$ per exam - for students with financial need, the College Board provides exam-fee reductions. There are also additional sources of federal and state funding that may be available for your child. Be sure to check with your child's counselor or AP Coordinator early to arrange for assistance if needed.

## Advanced Placement (AP)

- AP Biology
- AP Environment Science

## Tennessee AP Access for ALL

AP Access for ALL is a partnership between TDOE and Niswonger Foundation to offer virtual AP courses to students across the state. Niswonger has offered online AP courses since 2010 to districts in the first CORE region and since 2015 to districts across the state. AP Access for ALL will include professional development opportunities for current and new AP teachers.

AP Access for All Courses

| AP Art History | AP Computer Science Principles | AP US History |
| :--- | :--- | :--- |

## DUAL ENROLLMENT

Dual Enrollment courses provides the opportunity for $11^{\text {th }}$ and $12^{\text {th }}$ grade students to earn college credit by attending a college class while still attending high school.

## Tennessee Transfer Pathway

A college degree is valuable. So is your time and money. With the Tennessee Transfer programs, you can begin your college studies at a community college or similar two-year program and earn an associate degree, and rest assured your credits would transfer to a bachelor's degree program at any public university and many private universities in Tennessee. Learn more at www.tntransferpathways.org

Nashville State Community College: https://www.nscc.edu/admissions/high-school-programs
TCAT: Dickson: https://tcatdickson.edu/future-students/dual-enrollment

What to information to look for on the website?

- Important Dates and Deadlines
- Program and Admission Requirements
- Application Process and Important Forms
- Dual Enrollment Grant and Scholarship Information
- Frequently asked questions
- Contact Information for the college

See your school counselor early in the spring semester to discuss how Dual Enrollment courses would affect your high school course schedule.

## General Requirements for Dual Enrollment at APSU and NSCC

Please refer to each college website for the most up-to-date admission requirements.
Austin Peay State University Admission Requirements
Nashville State Community College Admission Requirements
Students taking any Dual Enrollment class should discuss with a College/University Admissions Counselor to find out whether the course will transfer to the College or University they plan to attend following graduation.

## Dual Enrollment Grant Information

## THERE'S MONEY FOR YOU TO DO DUAL ENROLLMENT APPLICATION DEADLINES

| TERM | 2-MEAR/4-YEAR | TCAT |
| :---: | :---: | :---: |
| FALL | SEPTEMBER 15 | NOVEMBER 1 |
| SPRING | FEBRUARY 1 | MARCH 1 |
| SUMMER | MAY 15 | MAY 15 |

APPLY FOR THE DUAL ENROLLMENT GRANT (DEG) AT TN.GOV/TSACSTUDENTPORTAL EACH ACADEMIC YEAR \& CHECK OUT COLLEGEFORTN-ORG FOR MORE ABOUT TENNESSEE FINANCIAL AID.

## TWO-YEAR OR FOUR-YEAR COLLEGE

To qualify for DEG at a two-year or four-year college, students must:

- Be a high school junior or senior
- Satisfy dual enrollment (DE) admissions criteria set by the college

To remain eligible for the grant, students must earn a cumulative 2.00 DE GPA for all courses attempted each semester.

Students dual enrolling at two colleges concurrently must contact the financial aid office at their primary DE oollege to complete a consortium agreement to receive funding for both colleges.
Award amounts for courses $1-5$ are based upon a course's credit hours. For example, $\$ 554.40$ is the award amount for a three-hour course.

| COURSE | AWARD |
| :---: | :---: |
| 1 | unvo \$554.40 |
| 2 | urno $\$ 554.40$ |
| 3 | $\sim$ - 5554.40 |
| 4 | $\sim$ - 555.4 .40 |
| 5 | unvo \$554.40 |
| 6-10 | - -0 \$ 100 Mensarr |

TN COLLEGE OF APPLIED TECHNOLOGY Any high school student (9th - 12th grade) may qualify for DEG at a TN College of Applied Technology (TCAT), as long as they meet the TCAT admissions criteria.

DEG will pay for up to 1296 clock hours at a TCAT.
Students dual enrolling at a TCAT and a two-year or four-year college
concurrently must contact the financial aid office at their primary BE college to complete a consortium agreement to receive funding for both colleges.

| CLOCK HOURS | AWARD |
| :---: | :---: |
| 1-40 | unvo \$211.0s |
| 41-80 | - 70 \$284.55 |
| 81-135 | unvo \$430.50 |
| 136-217 | W. 20 \$749.70 |
| 218-340 | -0.0 \$1,210.65 |
| 341-450 | uno \$1,354.50 |

| Pre-Calculus Algebra | MATH1710 | NSCC | Fall Semester only | 3 |
| Pre-Calculus Trigonometry | MATH1720 | NSCC | Spring Semester only | 3 |
| Fundamental of Communication | COMM2025 | NSCC | Spring Semester | 3 |
| Intro to Criminal Justice* | CRMJ1010 | NSCC | Fall Semester | 3 |
| Intro to Legal Process* | CRMJ1020 | NSCC | Spring Semester | 3 |
| English Composition I* | ENG1010 | NSCC | Fall Semester | 3 |
| English Composition II* | ENG1020 | NSCC | Spring Semester | 3 |
| Introduction to Psychology | PSYC 1030 | NSCC | Spring Semester | 3 |
| Intro Biology DE | BIOL 1010 | NSCC | Spring Semester | 4 |

Other NSCC On-Line Courses may be available. Click Here to see a list all available courses. Some of these courses have prerequisites. If you are interested, you need to meet with your grade level counselor.

## Dual Enrollment Programs offered at TCAT: Dickson

(Some are taught on DCHS Campus*, some are taught on TCAT: Dickson Campus.)
There may be a limited number of seats available for some classes at the TCAT: Dickson. Additional information in the CTE section of this course catalog. Other programs may be available depending on availability. See your School Counselor for more information.

| Auto Technology* | Machine Technology |
| :--- | :--- |
| CAD* | Pre-Nursing - Offered 2024-2025 |
| Digital Arts* | Residential/Commercial Construction* |
| HVAC | Welding |

## APSU/District Collaborative

Austin Peay State University is working with various counties to offer dual enrollment at a central location in the county during the academic year; summer offerings are on the APSU campus. Austin Peay offers high school students the opportunity to complete an Associate Degree while in high school. This can be accomplished in four ways: 1) completely online 2) on campus 3) a combination of on campus and online 4) a combination of online and at the student's high school.

The Associate of Science Liberal Arts degree requires 41 credit hours of core requirements and 18 hours of electives. It is hoped that students can complete many of the 18 elective hours in their intended major;
the dual enrollment office will work with students, parents and counselors to ensure students enroll in viable courses. Although it is possible to complete, the Associate Degree while in high school, students would need to take an average of 10 hours per semester (three to four classes), including summer after the sophomore year and summer after the junior year. Depending on the student's previous high school courses, courses taken would count for high school and college credits or for college credits only.
Students participating in the collaborative are enrolled in nine to ten credit hours (three to four classes) per semester. Courses are taught on site by an APSU faculty member or online at the central location. Students are expected to enroll in all courses offered at the site for a particular semester but are not obligated to enroll in every semester; summer, fall and spring offerings are available. Transportation matters are the decision of the school system in consultation with APSU.
Please note that to participate in the district collaborative, students must have college-level math, reading and English scores to enroll in the first summer set of classes.

Although the plans are designed primarily for rising juniors who will participate in the collaborative for two years, rising seniors may enroll in courses that are applicable to their needs and that will work with their high school schedule. Enrolling as a rising senior will not result in an associate degree. See your School Counselor for more details.

## What is Dual Credit?

Dual credit allows high school students to earn college credit for their CTE high school classes by taking a Dual Credit exam. College credit earned through the Dual Credit program may transfer to other postsecondary institutions at their discretion. It is up to you, as the student, to contact the receiving college or university to verify if the credit earned will transfer. Additional information is located in the CTE section of this course catalog.

## What is Statewide Dual Credit?

Statewide dual credit classes are college-level courses taught at the high-school level by trained highschool teachers. Tennessee high school and college faculty to ensure alignment with post-secondary standards develop course-learning objectives. All students enrolled in a statewide dual credit course take the online challenge exam, which is used to assess mastery of the postsecondary-level learning objectives. Students who meet or exceed the exam 'cut score' receive college credit that can be applied to any Tennessee public postsecondary institution.

## Statewide Dual Credit

- Introduction to Statistics - NSCC

## What is Local Dual Credit?

Local dual credit is a high school course aligned to a local post-secondary institution's course and exam. Students who pass the exam earn credits that are accepted and/or recognized by the local post-secondary institution. Courses are taught by licensed high school teachers or certified college instructors approved by the school system and the post-secondary institution. Consult with your teacher, CTE counselor or school counselor if you have questions regarding local dual credit.

## Local Dual Credit

- Intro to Criminal Justice - (CRMJ-1010DC) - NSCC
- Criminal Investigation - (CRMJ-1340DC) - NSCC
- Intro to Crime Scene Investigation - (CRMJ-1360DC) - NSCC
- Auto Desk Inventor (with passage of Autodesk Inventor Certified User Certification) - (CAD 2113) - NSCC
- Intro to Animal \& Veterinary Science - (ANSC 1410) - MTSU

## What are Industry Certifications?

Industry Certifications (IC) are earned through secondary and post-secondary career and technical education programs and courses. Consult with your teacher, CTE counselor or school counselor if you have questions regarding industry certifications.

Industry Certifications (may vary due to student interest and local or federal grant money)

- Agriculture - Commercial Pesticide (18+)
- Architecture \& Construction - NCCER Core Curriculum, NCCER Construction Technology, OSHA 10
- Automotive Maintenance and Light Repair - Automotive Service Excellence Entry Level Maintenance and Light Repair Certification (ASE), Snap-On Tire Pressure Management System (TPMS), Snap-On 535F Multimeters, Snap-On Electric/Mechanical Torque, Snap-On Batteries/Starting \& Charging, Snap-On Tool ID, OSHA 10, 609A-AC Certification (real world certification)
- Business Management \& Administration - MOS Word Associate, PowerPoint, and Excel
- CAD - Autodesk AutoCAD, Autodesk Revit
- Criminal Justice - FEMA 100 ICS Certification, Intro to the Incident Command System, E911 Basic Telecommunications Certification
- Digital Arts \& Design - Adobe Certified Professional - (Illustrator), (InDesign), (Photoshop)
- Health Science - Certified Clinical Medical Assistant, Certified Patient Care Technician
- Human Services - ServSafe Food Handler
- STEM - Autodesk Inventor Certified User

## COURSE OFFERINGS \& DESCRIPTIONS

## ENGLISH - LANGUAGE ARTS

## ENGLISH HONORS PROGRAMS

The English Department offers Honors level courses for each grade level of a student's high school career. These courses are designed to challenge students above and beyond the rigor provided in other English courses. The expectations for student progress and achievement in these courses are highly demanding. Acceptance in the program will be based on teacher and school recommendation. There will be required Summer Reading for English Honors classes.

## $9^{\text {th }}$ GRADE ENGLISH

## ENGLISH I - Course \# G01H09

## 1 Credit: $9^{\text {th }}$

This freshman course includes analyzing complex texts and thinking critically with a concentration on improving language, reading, and writing skills needed for success in high school.

ENGLISH I HONORS - Course \# G01H09HON

## 1 Credit: $\mathbf{9}^{\text {th }}$

Prerequisite: 8th grade ELA teacher recommendation.
This course provides a more in-depth approach to the skills and content covered in the English I course. Summer reading WILL BE REQUIRED and will be assessed sometime during the first two
weeks of school. A title will be supplied before the end of the 8 th-grade year. In addition to extended writing assignments throughout the year, a works cited page and research project will be required during the last quarter of the school year.

## $10^{\text {th }}$ GRADE ENGLISH

## ENGLISH II - Course \# G01H10

## 1 Credit: $10^{\text {th }}$

This sophomore course continues the exploration of complex texts and critical thinking begun in English I. There is a continued focus on advancing language, reading, and writing skills, as well as the skills needed to effectively work both independently and collaboratively.

## ENGLISH II HONORS - Course \# G01H10HON

## 1 Credit: 10 ${ }^{\text {th }}$

Prerequisite-Students must have an $A / B$ average in English I Honors OR students must have an $A / B$ average in English I AND a recommendation from their teacher.
This honors course expands on the English II curriculum and is designed to give college-bound students additional preparation for the demands of academic scholarship. Students MUST COMPLETE THE SUMMER READING ASSIGNMENT prior to the first day of school. This will be assessed sometime during the first two weeks of school. The title will be provided in the spring semester of 9th grade. In addition to extended writing assignments throughout the year, a 2-page MLA formatted essay and an annotated bibliography will be required during the last quarter of the school year.

## $11^{\text {th }}$ GRADE ENGLISH

Students wanting to take DE Comp I \& II Senior year are encouraged to take English III Honors Junior year.

## ENGLISH III - Course \# G01H11

## 1 Credit: $11^{\text {th }}$

This junior course focuses on increasing proficiency with complex texts, critical thinking, and composition. The course is built around a study of foundational documents and fictional and informational texts drawn from American literature. Additional independent reading will be required throughout the school year. There is also an emphasis on the skills addressed on the ACT exam administered to students during the junior year.

## ENGLISH III HONORS - Course \# G01H11HON

## 1 Credit: $11^{\text {th }}$

## Prerequisite-Students must have an A/B average in English II Honors OR students must have an

 A/B average in English II AND a recommendation from their teacher.English III Honors is a pre-college course designed to transition students from high school reading and writing expectations to the demands of college English. In this course, students will learn to read critically and to compose multi-page arguments and literary analyses. Emphasis will be placed on preparing students for the ACT exam in the spring. SUMMER READING will be required and will be assessed sometime during the first two weeks of school. A title will be provided during the spring semester of 10th grade. Extended writing, as well as independent reading, class discussions, and public speaking are expected in this course. In addition, during the course, students will submit a 3-5 page research paper with an annotated bibliography. Students who complete this course will be prepared
to take Dual Enrollment Composition 1010 through Nashville State Community College in their senior year.

# RESEARCH WRITING FOR COLLEGE \& CAREER - Course \# Y01HA2 

1/2 Credit: $\mathbf{1 1}^{\text {th }}, 12^{\text {th }}$

## Corequisite: Juniors taking Engilsh Comp I DE Stronly Recommend: 3.0 GPA and ACT English Score of 19 or higher.

Research for College \& Career is a college-preparatory elective course designed to prepare juniors and seniors for writing college research papers, proposals, and projects in any field of study. Students will learn how to create a research proposal and to use all 3 major forms of college documentation (MLA, APA, and Chicago) to integrate sources. Readings are drawn primarily from the areas of science, humanities, and technology. Assignments will encourage students to explore the research resources, patterns of discourse, and conventions of their own major disciplines. Students planning on attending a university who are not enrolled in DE English Composition are encouraged to enroll. Extended paper and a presentation to a field expert are required components of this course. This is a semester 1 course.

## ENGLISH COMPOSITION I DE - Course \# GO1H30-11

1 Credit: $11^{\text {th }}$
Prerequisite: English II Honors Teacher's recommendation and meet Nashville State admission requirements. (3.0 GPA and an ACT English score of 18 or higher.) Students must enroll in the dual enrollment course for college credit through Nashville State Community College.
Corequisite: Juniors taking Engilsh Comp I DE must also take Research Writing for College \& Career during Semester 1.
A study of style, syntax, and basic organizational patterns. Topics include various rhetorical patterns, audience, purpose, diverse perspectives, writing, revising, and editing. A minimum of 3 smaller papers and a longer documented research paper required. Independent reading, class discussion, regular attendance, and technology access required. English Composition II DE will be offer your Senior year and count as your English IV credit. If a junior takes DE Comp I junior year and elects to not take DE Comp II senior year, they will be required to take English IV Honors. This is a semester 2 course.

## $12^{\text {th }}$ GRADE ENGLISH

## ENGLISH IV - Course \# G01H13

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

This senior-level course is focused on application of close-reading, writing, and critical thinking skills in a project-based learning context. Students are required to apply previously acquired skills in a variety of contexts. Particular attention is given to helping students demonstrate mastery of skills needed for college and career readiness.

## ENGLISH IV HONORS - Course \# G01H13HON

1 Credit: $12^{\text {th }}$
Prerequisite-Students who have attained at least a B average in English III regular AND a recommendation from their teacher.
This course is designed for students who plan to go to college but who choose not to enroll in Dual Enrollment Composition 1010. This course will improve students' college readiness by teaching the basics of college-level essay writing. This course will also help students to improve their ACT English and ACT reading scores. SUMMER READING will be required and assessed sometime during the
first two weeks of school. In addition, during the course, students will submit a 3-5 page research paper (topic of their choosing) with an annotated bibliography.

## ENGLISH COMPOSITION I DE* - Course \# GO1H30 <br> 1 Credit: $12^{\text {th }}$

*You are expected to complete the fall semester and spring semester in most of these courses unless otherwise noted or prior permission is granted by the principal or school counselor.
Prerequisite: 3.0 GPA and an ACT English score of 18 or higher. Students must enroll in the dual enrollment course for college credit through Nashville State Community College.
A study of style, syntax, and basic organizational patterns. Topics include various rhetorical patterns, audience, purpose, diverse perspectives, writing, revising, and editing. A minimum of 3 smaller papers and a longer documented research paper required. Independent reading, class discussion, regular attendance, and technology access required. This course offered during Semester 1. If a senior takes DE Comp I and wants out of Comp II, they will not be removed from the class. They simply will only receive a high school credit for Semester 2 . The work will be the same.

## ENGLISH COMPOSITION II DE* - Course \# GO1H31

$$
1 \text { Credit: } \text { 12 }^{\text {th }}
$$

*You are expected to complete the fall semester and spring semester in most of these courses unless otherwise noted or prior permission is granted by the principal or school counselor.
Prerequisite: Successful completion of English Comp. I DE. Students must enroll in the dual enrollment course for college credit through Nashville State Community College.
The second semester study of English 1010, English 1020 is a study of argumentative and analytical writing. Topics include advanced methods of composition, analysis and explication of literature/ essays, elements of persuasion, use of evidence, and advanced methods of research. A minimum of 3 smaller papers and a longer argumentative paper/project required. Independent reading, class discussion, regular attendance, and technology access required. Students are expected to meet all college requirements including 3 papers, a midterm, and a final.

## RESEARCH WRITING FOR COLLEGE \& CAREER - Course \# Y01HA2 <br> $1 / 2$ Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Stronly Recommend: 3.0 GPA and ACT English Score of 19 or higher.

Research for College \& Career is a college-preparatory elective course designed to prepare juniors and seniors for writing college research papers, proposals, and projects in any field of study. Students will learn how to create a research proposal and to use all 3 major forms of college documentation (MLA, APA, and Chicago) to integrate sources. Readings are drawn primarily from the areas of science, humanities, and technology. Assignments will encourage students to explore the research resources, patterns of discourse, and conventions of their own major disciplines. Students planning on attending a university who are not enrolled in DE English Composition are encouraged to enroll. Extended paper and a presentation to a field expert are required components of this course. This is a semester course.

## CREATIVE WRITING - Course \# G01H16

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$

Creative writing will be an advanced course in writing for the students serious about improving writing skills in such areas as the short story, monologues, one-act plays, novellas, and more complex forms of poetry. Creative Writing does not fulfill the general English graduation requirement; however, this course does satisfy a Humanities Focus Area requirement.

## COMPETITIVE SPEECH \& DEBATE - Course \# G01H06

1 Credit: $\mathbf{1 0}^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$

This course is an in-depth study of public speaking, debate and oral interpretation of literature. Students will learn to prepare and present several types of individual speeches, debate cases, and acting scenes. They will also participate in group communication projects such as congressional debate and interpreters' theater. Students enrolled in this course will become part of the DCHS Speech Team. Students will be required to participate in at least two interscholastic contests each semester. Speech tournaments are held on Saturdays throughout the year. This course satisfies a Humanities Focus Area requirement.

## SPEECH COMMUNICATION DUAL ENROLLMENT - Course \# G05H55

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

## Prerequisite: English Composition I 1010 DE

Students must meet Nashville State admission requirements. Students must enroll in the dual enrollment course for college credit through NSCC.
This course is a college-level introductory survey of the discipline of human communication that fulfills General Education requirements for oral communication at most postsecondary institutions. Topics include public speaking, group communication, intercultural communication, interpersonal communication, the nature and value of language, nonverbal communication, persuasion and the art of rhetoric, and listening skills. This class is conducted in a lecture/discussion format with numerous presentations and speech performance projects. This course satisfies a Humanities Focus Area requirement. Students taking this course will be scheduled in Speech Communications Honors for Semester 1 and receive the Dual Enrollment Credit in Semester 2.

ALGEBRA I - Course \# G02H00
1 Credit: $9^{\text {th }}, 10^{\text {th }}$
Algebra I emphasizes linear and quadratic expressions, equations, and functions. This course also introduces students to polynomial, rational, and exponential functions with domains in the integers.

Students explore the structures of and interpret functions and other mathematical models. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

## ALGEBRA II - Course \# G02H05

## 1 Credit: $10^{\text {th }}, 11^{\text {th }} \cdot 12^{\text {th }}$

Prerequisite: Algebra I and Geometry
Algebra II emphasizes polynomial, absolute value, quadratic, radical, rational and exponential expressions, equations, and functions. This course also introduces students to the complex number system, basic trigonometric functions, and foundational statistics skills such as interpretation of data and making statistical inferences. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically.

## ALGEBRA II HONORS - Course \# G02H05HON

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

Prerequisite: Algebra I and Geometry Honors with at least a B average
This course provides an in-depth study of Algebra II concepts and a solid foundation for Pre-Calculus Honors. It is STRONGLY recommended that you have taken Geometry Honors before taking Algebra II Honors. Algebra II emphasizes polynomial, absolute value, quadratic, radical, rational and exponential expressions, equations, and functions. This course also introduces students to the complex number system, basic trigonometric functions, and foundational statistics skills such as interpretation of data and making statistical inferences. Students build upon previous knowledge of equations and inequalities to reason, solve, and represent equations and inequalities numerically and graphically. This class includes projects, research, and the use of technology.

## GEOMETRY - Course \# G02H11

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ Prerequisite: Algebra I

Geometry emphasizes similarity, right triangle trigonometry, congruence, and modeling geometry concepts in real life situations. Similarity and Congruence will be developed using transformations. Students build upon previous knowledge of similarity, congruence and triangles to reason mathematically. This course also introduces students to geometric constructions and circles. Students show a progression of mastery and understanding of the use and application of surface area \& volume.

## GEOMETRY HONORS - Course \# G02H11HON

## 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }}$

Prerequisite: Algebra I with at least a B average.
This course provides an in-depth study of Geometry concepts and helps prepare students for Algebra II Honors. Geometry emphasizes similarity, right triangle trigonometry, congruence, and modeling geometry concepts in real life situations. Similarity and Congruence will be developed using transformations Students build upon previous knowledge of similarity, congruence and triangles to reason mathematically. This course also introduces students to geometric constructions and circles. Students show a progression of mastery and understanding of the use and application of surface area and volume. This class includes projects, research, the use of technology, and may require a summer assignment/project.

## PRE-CALCULUS - Course \# G02H23 <br> 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Algebra II

Pre-calculus is designed to prepare students for college level courses. Students extend their knowledge
of the complex number system to use complex numbers in polynomial identities and equations. Topics for student mastery include vectors and matrix quantities, sequences and series, parametric equations, and conic sections. Students use previous knowledge to continue progressing in their understanding of trigonometric functions and using regression equations to model quantitative data.

## PRE-CALCULUS ALGEBRA DUAL ENROLLMENT (College Algebra DE) - Course \# G02H90

## 1 credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Algebra II and a Math ACT score of 19 or higher.
Dual Enrollment in the fall semester for NSCC Math 1710 - Pre-calculus Algebra (3 college credits). A TI-84 graphing calculator is required for this course. Upon completion of this course, students will be able to apply algebraic methods to solutions of practical problems; explore the capabilities for the graphing calculator to better understand algebraic concepts; develop an understanding of functions from graphical, numeric, and symbolic viewpoints; become familiar with polynomial, rational, exponential, and logarithmic functions including modeling real-life problems; solve systems of linear equations by a variety of methods including matrix methods; and apply counting principles in the computation of probabilities. Other topics covered include, trigonometric functions and their graphs and related transformations, vectors, matrix quantities, conic sections, sequences and series and parametric equations. This is a fall semester class.

## PRE-CALCULUS TRIGONOMETRY DUAL ENROLLMENT - Course \# G02H91

1 Credit: 11th, 12th
Prerequisite: Algebra II Honors is strongly recommended. Algebra II Regular must have an A average of at least a 97 and the recommendation of the Algebra II teacher. Students MUST enroll in the dual enrollment course (spring semester) for college credit through NSCC: Math 1720 - Pre-calculus Trigonometry (3 college credit hours).
A TI-84 graphing calculator is required for this course as technology will be used extensively. PreCalculus is a college course designed to prepare students for college level STEM focused courses. Students will: extend their knowledge of the complex number system to use complex numbers in polynomial identities and equations; apply algebraic methods to solutions of practical problems, explore the capabilities for the graphing calculator to better understand algebraic concepts; develop an understanding of functions from graphical, numeric, and symbolic viewpoints; become familiar with polynomial, rational, exponential, logarithmic, and trigonometric functions including modeling real-life problems; solve systems of linear equations by a variety of methods including matrices; complete an indepth study of trigonometry functions including identities and trigonometric graphs along with their related transformations; study vectors and matrix quantities, conic sections, sequences and series, and parametric equations. This class may include projects, research, and a summer assignment/project. This is a spring semester class.

## CALCULUS DUAL ENROLLMENT - Course \# G02H51

## 1 Credit: $12^{\text {th }}$

Prerequisite: Pre-Calculus Trigonometry Dual Enrollment (Math 1020); (4 college credit hours). Dual Enrollment requires 3.0 GPA
Students must enroll in the dual enrollment course for college credit for Calculus through Austin Peay State University or be prepared to take the AP Calculus AB test at the end of the school year.
A TI-84 graphing calculator is required for this course. Calculus is designed for students interested in STEM-based careers and builds on the concepts studied in Pre-Calculus. Calculus is the study of limits, the derivative as a rate of change, integration, and applications of integration. This class includes projects, research and the use of technology, and may require a summer assignment/project. Students taking this course will be scheduled in Calculus Honors for Semester 1 and receive the Dual Enrollment Credit in Semester 2.

# STATISTICS - Course \# G02H37 

1 Credit: $12^{\text {th }}$
Prerequisite: Algebra II
A TI-84 graphing calculator is required for this course. Statistics is designed to introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. The major themes in Statistics include: interpreting categorical and quantitative data, conditional probability, and other rules of probability, using probability to make decisions, making inferences, justifying conclusions, and hypothesis testing.

## STATISTICS DUAL ENROLLMENT - Course \# G02H49

1 Credit: $\mathbf{1 2}^{\text {th }}$
Prerequisite: A or B in Algebra II, Algebra II Honors, Pre-Calculus, or Pre-Calculus Dual Enrollment. Dual Enrollment requires 3.0 GPA and a Math ACT of 19 or Higher. Dual enrollment in the spring semester NSCC Math 1530 (3 college credits).
Students must enroll in the Spring semester dual enrollment course for college credit for Statistics through NSCC. A TI-84 graphing calculator is required for this course. An introduction to basic concepts and formulas for both descriptive and inferential statistics - Topics include: the nature of data, uses and abuses of statistics, methods of sampling, summarizing data, pictures of data, counting techniques, measures of central tendency, measures of variation, measures of position, understanding probability, binomial and normal distributions, Central Limit Theorem, confidence intervals, fundamentals of hypothesis testing for both one and two samples, ANOVA, linear regression and a brief introduction to nonparametric statistics. This course is particularly helpful for education majors and for students who plan to major in nursing or other medical fields. This class includes projects, research and the extensive use of technology. Students taking this course will be scheduled in Statistics Honors for Semester 1 and receive the Dual Enrollment Credit in Semester 2.

SAILS STATISTICS - Statewide Dual Credit - Course \# G02H75

## 1 Credit; $12^{\text {th }}$

Prerequisite: If a student has less than 19 on their ACT Math Sub-score OR has a cumulative GPA of 3.0 or less (on a 4.0 scale), they are eligible to take SAILS Statistics.
This course aligns with the SDC learning objective and the college math remediation for Intro to Probability \& Statistics and Math for General Studies. In addition, this counts as an EPSO for students who take the SDC Challenge Exam. Students who pass the SDC Challenge Exam may earn college credit.

## MATHEMATICAL REASONING FOR DECISION MAKING - Course \# G02H97

1 Credit: 12th
Prerequisite: Algebra I, Geometry, and Algebra II
Applications and modeling using mathematics are the primary focus of this course. Throughout the course, students explore mathematical content in the context of applications to the real-world. Topics will build upon previous knowledge requiring students to reason, solve, and represent mathematical concepts in multiple ways to encourage the use of math to answer problems students will encounter in life. This course is best intended for students who are planning to attend a College of Applied Technology, military service, or enter the workforce immediately following graduation.

## PHYSICAL SCIENCE - Course \# G03H00

## 1 Credit: $\mathbf{9}^{\text {th }}$

Physical Science is a laboratory science course that explores the relationship between matter and energy. Students investigate physical science concepts through an inquiry-based approach. Embedded standards for Inquiry, Technology \& Engineering, and Mathematics are taught in the context of the content standards for Energy, Matter, Motion, and Forces. Emphasis will be placed on preparation for Chemistry.

## BIOLOGY I - Course \# G03H03 <br> 1 Credit: $11^{\text {th }}$

Biology I is a course that introduces students to the study of living things at various levels of organization. Students will explore basic life processes. Topics covered are cells and cell processes, genetics, interactions, diversity, taxonomy, ecology, biological evolution and biotechnology. Biology I should provide students with the knowledge to make informed decisions about their bodies, their health and their world.

## BIOLOGY I HONORS - Course \# G03H03HON

## 1 Credit: $9^{\text {th }} \boldsymbol{\&} 11^{\text {th }}$

This course covers the topics of cells and cell processes, genetics, interactions, diversity, taxonomy, ecology, biological evolution and biotechnology. The class moves at a faster pace and is more in depth that Regular Biology I. Students are expected to be self-motivated and to achieve a level of mastery of the subject material. Special emphasis is placed on problem solving and student participation. A science fair project or a research paper is required.

## BIOLOGY AP - Course \# G03H10

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Prerequisites: Biology I Honors and Chemistry I Honors

This course is structured around the four big ideas and the enduring understandings identified in the Curriculum Framework. All essential knowledge will be taught and all learning objectives will be addressed through this curriculum. The course will focus on inquiry-based laboratory work and the use of the seven science practices in both lab and non-lab activities. The four Big ideas are: Big idea 1: The process of evolution drives the diversity and unity of life. Big idea 2: Biological systems utilize free energy and molecular building blocks to grow, to reproduce and to maintain dynamic homeostasis. Big idea 3: Living systems store, retrieve, transmit and respond to information essential to life processes. Big idea 4: Biological systems interact, and these systems and their interactions possess complex properties. Students are required to take the AP Exam, which costs approx. \$100.

## SCIENTIFIC RESEARCH - Course \# G03H35

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisites: Completion of High School Biology and Chemistry (Regular or Honors) and 3.6 GPA or 18 English Sub-Score on an ACT test.
This course will introduce students to the practice of identifying, developing, and conducting a scientific investigation. Students will develop and conduct an original scientific investigation, write a scientific
paper using APA format, and present their findings. Content for Scientific Research and Biology DE will be taught throughout the full academic year. This is a semester course with students enrolled in Scientific Research during the fall semester and Biology DE during the spring semester.

## INTRO TO BIOLOGY I DUAL ENROLLMENT - Course \# G03H45

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisites: Completion of High School Biology and Chemistry (Regular or Honors) and 3.6 GPA or 18 English Sub-Score on an ACT test.
This course serves as an introductory biology course for students who are non-science college majors. (It will satisfy 4 of 8 credits for the general education requirement for Natural Sciences Lab course.) Topics include cell structure and function, organic molecules and energy pathways, genetics, evolution, and the principles of ecology. This course does not fulfill the science requirements for college science majors. Biology 1010 is offered through Nashville State Community College. This is a semester course with students enrolled in Scientific Research during the fall semester and Biology DE during the spring semester.

## EARTH \& SPACE SCIENCE - Course \# G03H02

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## This course satisfies a STEM requirement.

This course is designed as a regular-level science course that can be taken by students wanting to fulfill their high school science requirement. It is divided into studies of the Earth and of the universe around it, which includes geology, oceanography, meteorology, astronomy, and environmental science. The course level is the same as Regular Biology. This course is not designed for college-bound students.

## CHEMISTRY I - Course \# G03H12

## 1 Credit: $10^{\text {th }}, 1^{\text {th }}$

Prerequisites: Algebra I \& Physical Science (Prerequisite of Physical Science may be waived for students with a 1st Semester average of 85\% or greater in Algebra I.)
This course is designed for students who realize that some knowledge of chemistry is vital to the consumer in our technological society. It attempts to familiarize the student with general chemical principles (such as those dealing with the re-activities of the elements and the general properties of solids, liquids, and gases) in an easier and slower fashion than Honors Chemistry. Problem solving, and reasoning skills are still emphasized, and a good working knowledge of fundamental algebra is essential. Laboratory work will develop observation and interpretation skills.

## CHEMISTRY 1 HONORS - Course \# G03H12HON

1 Credit: $1^{\text {th }}$
Prerequisites: Biology I Honors \& Algebra I with a 1st semester average of 90\% or greater.
This course is designed for students who are interested in science or health field careers. Since it emphasizes higher-order thinking skills, it also provides excellent preparation for most college work. A challenging course, it provides a general survey of chemistry with emphasis on problem-solving and reasoning skills. The re-activities of elements will be explored as well as the general properties of solids, liquids, and gases. Laboratory work will be provided for development of technique, observational ability, and interpretation. A working knowledge of algebra is essential. A project or paper is required to earn Honors points.

## ENVIRONMENTAL SCIENCE AP - Course \# G03H25

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Recommended Prerequisite: Students should have completed two years of high school laboratory science - one year of life science and one year of physical science (for ex., a year of biology and a

# year of chemistry). Due to the quantitative analysis required in the course, students should also have taken at least one year of algebra. 

The AP Environmental Science course is designed to be the equivalent of a one-semester, introductory college course in environmental science, through which students engage with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. The course requires that students identify and analyze natural and human-made environmental problems, evaluate the relative risks associated with these problems, and examine alternative solutions for resolving or preventing them. Environmental Science is interdisciplinary, embracing topics from geology, biology, environmental studies, environmental science, chemistry, and geography. AP Environmental Science is a lab/field investigation intensive course. The class will also participate in a community environmental improvement project. Some of the field investigations and the class project will require work outside of school hours. Students are required to take the AP exam, which costs approximately $\mathbf{\$ 1 0 0}$.

## PHYSICS HONORS - Course \# G03H20HON <br> 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Recommended prerequisites: Physical Science; Algebra II or Pre-Calculus

Physics is a laboratory science course that examines the relationship between matter and energy and how they interact. This course will have a strong emphasis in the mathematics of physics. Students explore physics concepts through an inquiry approach. Embedded standards for Inquiry, Technology \& Engineering, and Mathematics are taught in the context of the content standards for Mechanics, Thermodynamics, Waves and Sound, Light and Optics, Electricity and Magnetism and Atomic \& Nuclear Science.

## SOCIAL STUDIES

## WORLD HISTORY \& GEOGRAPHY - Course \# G04H10

## 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }}$

Students will study the rise of the nation-state in Europe, the origins and consequences of the Industrial Revolution, political reform in Western Europe, imperialism across the world, and the economic and political roots of the modern world. Students will explain the causes and consequences of the great military and economic events of the past century, including the World Wars, Great Depression, Cold War, and Russian and Chinese Revolutions. Students will study the rise of nationalism and the continuing persistence of political, ethnic, and religious conflict in many parts of the world. Students will explore geographic influences on history, with attention to political boundaries that developed with the evolution of nations from 1750 to the present and the subsequent human geographic issues that dominate the global community. Additionally, students will examine aspects of technical geography and how these innovations continuously impact geopolitics in the contemporary world.

This course is a continuation of the 6th and 7th grade survey courses of world history and geography and is designed to help students think like historians, focusing on historical concepts in order to build a foundational understanding of the world. Appropriate primary sources have been embedded in the standards in order to deepen the understanding of world history and geography. Special emphasis will be placed on the contemporary world and its impact on students today.

## WORLD HISTORY \& GEOGRAPHY HONORS - Course \# G04H10HON

## 1 Credit: $\mathbf{9}^{\text {th }}$

Honors world history students should be open to a more rigorous examination of historical events that focuses on critical thinking and analysis as well as writing and reading comprehension. Our study will
begin at the Renaissance in Europe and include the Scientific Revolution, the Age of Absolutism, the Industrial Revolution, the French Revolution, Imperialism, the Russian Revolution, the World Wars, Great Depression, Cold War, and Chinese Revolutions. Because students will explore geographic influences on history, we will study modern political geography. Students should have a love of history, reading and writing. Students will complete Geography standards at a quicker pace and will require some outside reading for class. Additionally, Honors students should read and write at a higher level. Students will tested over the 40 European countries the first week of school.

## PERSONAL FINANCE - Course \# G04H36 <br> $1 / 2$ Credit: $\mathbf{1 2}^{\text {th }}$

Personal Finance is a course designed to inform students how individual choices directly influence occupational goals and future earnings potential. Real world topics covered will include income, money management, spending and credit, as well as saving and investing.

## CONTEMPORARY ISSUES - Course \# G04H17

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Students will use inquiry skills to examine the issues that impact the contemporary world. Students will analyze the historical, cultural, economic, and geographic factors that have elevated certain issues to levels of concern in the United States and around the globe. Students will engage in research and problem solving in order to better understand and assess significant current issues. This course satisfies a Humanities Focus Area requirement.

## U.S. GOVERNMENT \& CIVICS - Course \# G04H12 1/2 Credit: $11^{\text {th }}$

Students will study the purposes, principles, and practices of American government as established by the United States Constitution. Students will learn the structure and processes of the government of the state of Tennessee and local governments. Students will recognize their rights and responsibilities as citizens as well as how to exercise these rights and responsibilities at the local, state, and national levels. This course can be used for compliance with T.C.A. § 49-6-1028, in which all districts must ensure that a project-based civics assessment is given at least once in grades 4-8 and once in grades 9-12.

## U.S. GOVERNMENT HONORS - Course \# G04H12HON

## 1/2 Credit: 11 ${ }^{\text {th }}$

## Prerequisite: Must have 3.0 GPA

Honors government is a one semester course which offers an issue-oriented approach in the study of Government. Major themes and traditions which make American Government in particular unique and exceptional will be explored in detail. Course objectives include, understanding the institutional, cultural and social forces that have shaped the government of our nation, identify the structure and construction of government, analysis the dynamic features which allow government to adapt to changing times and attitudes, develop a framework for determining the purpose of government in an attempt to evaluate its effectiveness. Honors students are expected to complete a project which can range from a presentation, a paper or even the creation of symbolic art relating to government. This course can be used for compliance with T.C.A. § 49-6-1028, in which all districts must ensure that a project-based civics assessment is given at least once in grades 4-8 and once in grades 9-12.

## ECONOMICS - Course \# G04H13

1/2 Credit: $\mathbf{1 1}^{\text {th }}$
Students will examine the allocation of scarce resources and consider the economic reasoning used by consumers, producers, savers, investors, workers, and voters. Students will explore the concepts of scarcity, supply and demand, market structures, national economic performance, money and the role of
financial institutions, economic stabilization, and trade. Finally, students will examine key economic philosophies and economists who have and continue to influence economic decision-making.

## ECONOMICS HONORS - Course \# G04H13HON

## $1 / 2$ Credit: 11 ${ }^{\text {th }}$

Prerequisite: Must have 3.0 GPA
This course is geared toward Juniors desiring a more challenging study of economic principles and for students interested in a career in the social studies. The same fundamental concepts will be covered as in the regular course but with less emphasis on consumer economics and more emphasis on expanding skills used in college courses. Students will work beyond the classroom analyzing case studies of economic situations and keeping portfolios of current issues, interviews, and surveys.

## U.S. HISTORY \& GEOGRAPHY - Course \# G04H11 1 Credit: 12 $^{\text {th }}$

Students will examine the causes and consequences of the Industrial Revolution and the United States' growing role in world diplomatic relations, including the Spanish-American War and World War I. Students will study the goals and accomplishments of the Progressive movement and the New Deal. Students will also learn about the various factors that led to our nation's entry into World War II, as well as the consequences for American life. Students will explore the causes and course of the Cold War. Students will study the important social, cultural, economic, and political changes that have shaped the modern-day U.S. resulting from the Civil Rights Movement, Cold War, and recent events and trends. Additionally, students will learn about the causes and consequences of contemporary issues impacting the world today.

Students will continue to use skills for historical and geographical analysis as they examine U.S. history after Reconstruction, with special attention to Tennessee connections in history, geography, politics, and people. Students will continue to learn fundamental concepts in civics, economics, and geography within the context of U.S. history. The reading of primary source documents is a key feature of the U.S. history course. Specific primary sources have been embedded within the standards for depth and clarity. Finally, students will focus on current human and physical geographic issues important in the contemporary U.S. and global society. This course will place Tennessee history, government, and geography in context with U.S. history in order to illustrate the role our state has played in our nation's history. This course is the second of a two-year survey of U.S. history and geography, continuing from 8th grade's study of U.S. history and geography.

## U.S. HISTORY \& GEOGRAPHY HONORS - Course \# G04H11HON

## 1 Credit: 12 $^{\text {th }}$

This course will provide a more rigorous examination of American history from Reconstruction to the present, with special attention to Tennessee connections during this time. This course will also focus on the close analysis of primary source documents at a much higher level than a regular course. Honors students will be required to complete extensive reading and writing assignments outside of class, including a summer reading assignment of Upton Sinclair's novel The Jungle. Students must complete the summer reading assignment by the beginning of school and will be assessed on their reading of the novel in the first week of school. Students will also take the Tennessee End-of-Course (EOC) Test at the end of the year.

# EARLY UNITED STATES HISTORY I DUAL ENROLLMENT - Course \# G04H48 

## 1 Credit: $12^{\text {th }}$

Students must meet APSU dual enrollment admission requirements.
*You are expected to complete the fall semester and spring semester in most of these courses unless otherwise noted or prior permission is granted by the principal or school counselor. This course is a college-level survey of United States history from Pre-Columbian civilizations to Reconstruction. The class format and exams are similar to college classes, focused more on analysis and interpretation. In lieu of a traditional research paper, students will engage in playing "Reacting to the Past" games to teach research, writing, and speaking skills through immersive role playing experiences. This class satisfies the U.S. History \& Geography Credit. Students completing this course and Survey II will receive 6 hours of college credit for U.S. History I \& II. This is a fall semester class.

## MODERN UNITED STATES HISTORY II DUAL ENROLLMENT - Course \# G04H49

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

Students must meet APSU dual enrollment admission requirements.
*You are expected to complete the fall semester and spring semester in most of these courses unless otherwise noted or prior permission is granted by the principal or school counselor. This course is a continuation of Survey of American History I and a college-level survey of United States history from Reconstruction to the present. The class format and exams are similar to college classes, focused more on analysis and interpretation. In lieu of a traditional research paper, students will engage in playing "Reacting to the Past" games to teach research, writing, and speaking skills through immersive role playing experiences. This class satisfies the U.S. History \& Geography Credit. Students completing this course and Survey I will receive 6 hours of college credit for U.S. History I \& II. This is a spring semester class.

## PSYCHOLOGY - Course \# G04H15

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## This course satisfies a Humanities Focus Area requirement.

Students will study the development of scientific attitudes and skills, including critical thinking, problem solving, and scientific methodology. Students will also examine the structure and function of the nervous system in humans, the processes of sensation and perception, lifespan development, and memory, including encoding, storage, and the retrieval of memory. Students will look at perspectives of abnormal behavior and categories of psychological disorders, including treatment thereof. Students will elaborate on the importance of drawing evidence-based conclusions about psychological phenomena and gain knowledge on a wide array of issues on both individual and global levels. Students will examine social and cultural diversity as well as diversity among individuals. Throughout the course, students will examine connections between content areas within psychology and relate psychological knowledge to everyday life while exploring the variety of careers available to those who study psychology.

## PSYCHOLOGY DUAL ENROLLMENT - Course \# G04H44

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Students wanting to take PSYC1030 can either have a HS 3.6 gpa, or ACT ENG-18+ score. Students must meet Nashville State admission requirements. Students must enroll in the dual enrollment course for college credit through NSCC. This course satisfies a Humanities Focus Area requirement.
Psychology Dual Enrollment is a college-level survey of the discipline (PSYC1030 Introduction to Psychology through Nashville State) which fulfills General Education requirements for social/behavioral sciences at most postsecondary institutions. Topics include historical and modern psychological perspectives, research methods, biopsychology, sensation and perception, consciousness, human development, learning and language development, social psychology, memory, cognition and intelligence, motivation and emotion, personality theories, abnormal psychology, stress management,
psychotherapies, and careers in psychology. The class is conducted in a lecture/discussion format with numerous demonstrations, experiments, and projects. Students taking this course will be scheduled in Psychology Honors for Semester 1 and receive the Dual Enrollment Credit in Semester 2.

## SOCIOLOGY - Course \# G04H14

## 1/2 Credit: $11^{\text {th }}, 12^{\text {th }}$

This course satisfies a Humanities Focus Area requirement.
Students will explore the ways sociologists view society and how they study the social world. Students will examine culture, socialization, deviance, and the structure and impact of institutions and organizations as well as selected social problems and how change impacts individuals and societies. The following standards reflect those recommended by the American Sociological Association (ASA National Standards for High School Sociology).

## YOUTH LEADERSHIP - SERVICE LEARNING - Course \# C25H15-YL 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

The Youth Leadership Committee determines placement in this course. The course content includes guest speakers, case studies, and trips to local businesses and government offices. Leadership qualities are developed through two major service learning projects. The first project requires students to research a community problem and create/change a public policy which addresses one of the root causes of the problem. The second project requires students to create a hands-on service learning project to address a community problem. The class also includes three components that must be completed outside the classroom; as well as, six field trip days. Only those students who have excellent attendance records will be considered for the class.

## COMMUNITY SERVICE - SERVICE LEARNING - Course \# C25H15-CS

## 1 Credit: 12 $^{\text {th }}$

A school program that integrates citizenship values into education made by involving students in community service. This course will integrate campus beautification and clean up, leadership responsibilities, and students will complete a community service project each semester (as a group). Applications must be made through administration. (This program takes the place of the past teacher aide positions, library aide positions, and office workers.)

## FINE ARTS

## VISUAL ARTS

## VISUAL ART I - Course \# G05H08

$$
1 \text { Credit: } 9^{\text {th }}, 10^{\text {th }},{11^{\text {th }}, 12^{\text {th }}}^{\text {l }}
$$

As the foundation course, Art 1: Foundations of Studio Art is the prerequisite course for the comprehensive high school art program and fulfills the one credit Fine Arts graduation requirement. Studio problems are designed to build creative and critical thinking skills through practice in drawing, painting, printmaking, sculpture, crafts, and other art disciplines. As students gain knowledge of the ways artists find and interpret ideas, they develop an understanding and appreciation of the role of the artist in a culturally diverse world. There is a \$20 supply fee if enrolled in this class. This course satisfies the Fine Arts requirement.

## VISUAL ART II - Course \# G05H09

1 Credit: $\mathbf{1 0}^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$<br>Prerequisite: Visual Art I

Art II builds on skills and techniques developed in Art I to develop further artistic skills. The course encourages independent study. Students should be talented in art and willing to experiment in new and different techniques and ideas. Exhibit of work in the school art show will be required. There is a $\$ 20$ supply fee if enrolled in this class.

## VISUAL ART III/IV - Course \# G05H10

1 Credit: $11^{\text {th }}, 12^{\text {th }}$
Prerequisite: Visual Art II and Teacher recommendation.
Students wishing to take Art III/IV must complete Art II with a B average or better. This course is designed to prepare students for admission to a four-year college level visual arts program, where portfolio reviews are nearly always required. Students enrolling in Art III/IV will develop a unique and personal body of work, and prepare a portolio for admission to selective college level visual arts programs and portfolio-based competitive scholarships. There is a \$20 supply fee if enrolled in this class.

## COMMERCIAL DESIGN (Art II Level - Specialty) - Course \# G05HC4 <br> $1 / 2$ Credit: $10^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Visual Art I

A study of the commercial side of art from advertising to gallery sales based around the elements and principles of art. Exhibit of work in the school art show will be required. There is a \$10 supply fee if enrolled in this class.

## 3D ART (Art II Level - Specialty) - Course \# G05H09-3D

1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$
Prerequisite: Visual Art I
This course is specifically designed to introduce students to the study and creation of three-dimensional art. A variety of mediums will be explored that will include Paper Mache wire sculpture, clay, assemblage and several other mediums. There is a \$20 supply fee if enrolled in this class.

## ADVANCED 3D ART - Course \# G05H09A3D

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Visual Art I, 3D Art and Teacher recommendation

This course is an extension of 3D Art and students are expected to have a good understanding of basic modeling techniques prior to enrollment. Advanced techniques will be explored as students are introduced to new mediums and building techniques. There is a \$20 supply fee if enrolled in this class.

## MIXED MEDIA with Printmaking (Art II - Specialty) - Course \# G05HC6

$$
\frac{1 / 2 \text { Credit: } 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}}{\text { Prerequisite: Visual Art I }}
$$

Mixed Media will explore painting techniques and other two and three-dimensional works requiring more than one medium. Stained glass mosaics, bookbinding, polymer clay and other media will be used. Printmaking will also encompass a variety of media such as linoleum block, embossing, monoprints, etching and others. Exhibit of work in the school art show is required. There is a \$10 supply fee if enrolled in this class.

## MUSIC

After auditions, students will be placed in the appropriate group. Students that are currently in a choral group, please sign up for the group you are currently in. These courses satisfy the fine arts requirement. ADDITIONAL FEES ARE ASSOCIATED WITH CHORAL CLASSES (dress rentals, cleaning, etc.). These fees are required if chosen for a choral group.

## CHORUS - Course \# G05X12CH9 <br> 1 Credit: $9^{\text {th }}$

Students who have never been in a choral group should sign up for this course. Students will study proper vocal technique and choral singing, music theory and history as well as participating in public performances throughout the year. ADDITIONAL FEES ARE ASSOCIATED WITH CHORAL CLASSES (dress rentals, cleaning, etc.). These fees are required if chosen for a choral group. This course satisfies the fine arts requirement.

## CHORUS - Course \# G05X12CHO

$$
1 \text { Credit: } 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}
$$

Students who have never been in a choral group should sign up for this course. Students will study proper vocal technique and choral singing, music theory and history as well as participating in public performances throughout the year. ADDITIONAL FEES ARE ASSOCIATED WITH CHORAL CLASSES (dress rentals, cleaning, etc.). These fees are required if chosen for a choral group. This course satisfies the fine arts requirement.

## WOMEN'S ENSEMBLE - Course \# G05X12-WE

1 Credit: $\mathbf{1 0}^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$
Students currently in Women's Ensemble, should sign up for this course. . Students will study proper vocal technique and choral singing, music theory and history as well as participating in public performances throughout the year. ADDITIONAL FEES ARE ASSOCIATED WITH CHORAL CLASSES (dress rentals, cleaning, etc.). These fees are required if chosen for a choral group. This course satisfies the fine arts requirement.

## CONCERT CHOIR - Course \# G05X12-CC <br> 1 Credit: $\mathbf{1 0}^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Students currently in Concert Choir, should sign up for this course. . Students will study proper vocal technique and choral singing, music theory and history as well as participating in public performances throughout the year. ADDITIONAL FEES ARE ASSOCIATED WITH CHORAL CLASSES (dress rentals, cleaning, etc.). These fees are required if chosen for a choral group. This course satisfies the fine arts requirement.

## GENERAL MUSIC - Course \# G05H11

1 Credit: $9^{\text {th }}, 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$
General Music is designed for the student who has always wanted to learn to read music but has not had the opportunity to do so. The course will cover basic musical terms, music notation and a brief introduction to the history of music. Students will have a chance to apply the knowledge to the piano. This course satisfies the fine arts requirement.

## MUSIC HISTORY - Course \# G05HB3 <br> 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$

This course will provide students with an understanding of music, its importance and context in a selected range of historical periods. We will study the periods of music including offering a unit on

Broadway music and popular music. Additional elements of music theory and music performance may also be offered. This course satisfies a fine arts credit.

## BAND \& PERCUSSION - Course \# G05X14B \&P

1 Credit: $9^{\text {th, }} 10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$
The purpose of this course is to provide musical enrichment for students. Students will study literature from all eras and provide opportunities for students to improve skills necessary to perform in the symphonic band. Each year the Dickson County High School Band travels to numerous contests, festivals, clinics, and athletic events. Members of this group also participate in marching band. The marching and concert bands present public performances throughout the year. As members of these groups, students are expected to spend time after school in rehearsals for special events. Fees will be charged for summer band camp, symphonic band camp, and trips. This course satisfies the fine arts requirement.

## BRASS BAND - Course \# G05X14BRS

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Students will be placed in the course by recommendation of the band director. The purpose of this course is to provide musical enrichment for students. Students will study literature from all eras and provide opportunities for students to improve skills necessary to perform in the symphonic band. Each year the Dickson County High School Band travels to numerous contests, festivals, clinics, and athletic events. Members of this group also participate in marching band. The marching and concert bands present public performances throughout the year. As members of these groups, students are expected to spend time after school in rehearsals for special events. Fees will be charged for summer band camp, symphonic band camp, and trips. This course satisfies the fine arts requirement.

## WOOD WIND - Course \# G05X14WW

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$

Prerequisite: The student will be placed in the course by recommendation of the director.
The purpose of this course is to provide musical enrichment for students. Students will study literature from all eras and provide opportunities for students to improve skills necessary to perform in the symphonic band. Each year the Dickson County High School Band travels to numerous contests, festivals, clinics, and athletic events. Members of this group also participate in marching band. The marching and concert bands present public performances throughout the year. As members of these groups, students are expected to spend time after school in rehearsals for special events. Fees will be charged for summer band camp, symphonic band camp, and trips. This course satisfies the fine arts requirement.

## THEATRE

## THEATRE ARTS I - Course \# G05H16

## 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }},{11^{\text {th }}, 12^{\text {th }}}^{\text {th }}$

Theatre Arts I is a beginning drama course designed to help students develop acting skills by participating in theatre warm ups, improvisation, scenes, monologues, and productions. We will also learn about the origins of drama, study significant plays and playwrights, write original scenes, and practice voice, movement, and characterization. This course satisfies the Fine Art requirement.

# ADVANCED THEATRE ARTS - Course \# G05H17 <br> 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Theatre I and an audition. 

The continuation of Theatre I emphasizes characterization, blocking, make-up, costuming, and the oneact play. The purpose of this year long course is to give the student an increased appreciation of theatre and additional experience in theater as an art form. They will read, write, and evaluate plays as well as view and critique electronic and live performances. History, culture, and technology will be examined, and career opportunities will be explored. Through creating theater, students will grow in their ability to comprehend the world and to communicate with others.

## WORLD LANGUAGES

## FRENCH I - Course \# G24H21

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

This course introduces the French language and emphasizes all skills: listening, speaking, reading, and writing skills in an integrated way. It includes how to greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics and to develop an understanding of French-speaking cultures. Throughout this course, listening and speaking skills and importance of proper pronunciation are emphasized, as well as introduction to reading and writing skills. Meaningful activities are designed to lead to a conscious control of the language system and an understanding of the French way of life, attitudes, and customs. Class participation and work outside of class are required.

## FRENCH I HONORS - Course \# G24H21HON

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

This course introduces the French language and emphasizes all skills: listening, speaking, reading, and writing skills in an integrated way. It includes how to greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics and to develop an understanding of French-speaking cultures. Those students taking the honors track will participate in accelerated French I activities and assignments; they will move at a faster pace and complete more units of study. This track is recommended for the highly motivated student. Strongly recommend student have A or B average English grade and French teacher or School Counselor's Recommendation.

## FRENCH II - Course \# G24H22

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

This course enhances Level One skills in French and provides opportunities to develop listening, speaking, reading, and writing skills in an integrated way. It also provides continued practice in how to greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics and to increase understanding of French-speaking cultures. A brief, basic review of French I begins the continuation of listening and speaking skills in a more sophisticated context. French grammar is covered in more depth. Class participation and work outside of class are required. Reading and writing skills are more heavily emphasized.

## FRENCH II HONORS - Course \# G24H22HON

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: an A in French I Honors or Teacher recommendation.
This course enhances Level One skills in French and provides opportunities to develop listening, speaking, reading, and writing skills in an integrated way. It also provides continued practice in how to
greet and take leave of someone, to ask and respond to basic questions, to speak and read within a range of carefully selected topics and to increase understanding of French-speaking cultures. Those students taking the honors track will participate in accelerated French II activities and assignments; they will move at a faster pace and complete more units of study. This track is recommended for the highly motivated student.

## FRENCH III HONORS - Course \# G24H23HON

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

Prerequisite: an A in French II Honors or Teacher recommendation.
This course enhances skills in French and provides opportunities to develop listening, speaking, reading, and writing skills in an integrated way. It also provides continued practice in how to read within a range of carefully selected topics and to increase understanding of French-speaking cultures. Those students taking the honors track will participate in accelerated French III activities and assignments; they will move at a faster pace and complete more units of study. This track is recommended for the highly motivated student.

## SPANISH I - Course \# G24H04

## 1 Credit: $10{ }^{\text {th }}, 11^{\text {th }}$

In Spanish I, emphasis is placed on pronunciation, vocabulary, listening comprehension, logic of the language, speaking, reading, writing, grammar, and Hispanic culture. Much drill and practice are offered the student in class through the use of audio-lingual and audio-visual materials.

## SPANISH 1 HONORS - Course \# G24H04HON

## 1 Credit: $\mathbf{1 0}^{\text {th }}, \mathbf{1 1}^{\text {th }}$

Those students taking the honors track will participate in accelerated Spanish I activities and assignments; they will move at a faster pace and complete more units of study. This accelerated Spanish I class is designed only for highly motivated students wishing to take four (4) years of Spanish in high school. Strongly recommend student have A or B average English grade and Spanish teacher or School Counselor's Recommendation.

## SPANISH II - Course \# G24H05

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Spanish II intensifies pronunciation, vocabulary, comprehension, logic of the language, speaking, reading, writing, grammar, and Hispanic culture. Students increase their vocabulary. This goal is achieved by much drill and practice in class through the use of audio-lingual and audio-visual materials. Culture study is enhanced through individual projects.

## SPANISH II HONORS - Course \# G24H05HON

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: an A in Spanish I Honors or Teacher recommendation.
Spanish II Honors intensifies pronunciation, vocabulary, comprehension, logic of the language, speaking, reading, writing, grammar, and Hispanic culture. Students increase their vocabulary. This goal is achieved by much drill and practice in class through the use of audio-lingual and audio-visual materials. Culture study is enhanced through individual projects.

## SPANISH III HONORS - Course \# G24H06HON

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: A or B in Spanish II Honors
Spanish III is a continuation of study and use of the language as a means of communication. The subjunctive is taught to provide fluency in the language. Spanish III is designed for those students who
wish to polish fine points of grammar, build vocabulary, and increase fluency. Culture of the Spanish speaking countries is continued with collaborative projects in the target language. This course satisfies a Humanities Focus Area requirement.

## OTHER COURSES

## PREPARING FOR ACT - Course \# G25H00

$1 / 2$ Credit: $10^{\text {th }}$ (Required for all $10^{\text {th }}$ Grade Students)
This course is specifically designed to help students be familiar with the ACT Test. It is NOT an academic tutoring opportunity. Students will explore question styles and samples for all four areas of the ACT test (reading, English, math and science), as well as sample prompts for the writing portion. If you are interested in compiling an intensive_subject review, take an early ACT prep course, and then use the results from your practice tests to build an independent review of weak subject areas. Students in this class will also have a semester of study hall. Not Offered in 2024-2025

## YOUTH LEADERSHIP - SERVICE LEARNING - Course \# C25H15-YL

 1 Credit: $11^{\text {th }}, 12^{\text {th }}$The Youth Leadership Committee determines placement in this course. The course content includes guest speakers, case studies, and trips to local businesses and government offices. Leadership qualities are developed through two major service learning projects. The first project requires students to research a community problem and create/change a public policy which addresses one of the root causes of the problem. The second project requires students to create a hands-on service learning project to address a community problem. The class also includes three components that must be completed outside the classroom; as well as, six field trip days. Only those students who have excellent attendance records will be considered for the class.

## SERVICE LEARNING: COMMUNITY SERVICE - Course \# C25H15-CS

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

A school program that integrates citizenship values into education made by involving students in community service. This course will integrate campus beautification and clean up, leadership responsibilities, and students will complete a community service project each semester (as a group). Applications must be made through administration. (This program takes the place of the past teacher aide positions, library aide positions, and office workers.)

## JOBS FOR TENNESSEE GRADUATES (JTG) - Course \# C25H09

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

This course is for seniors who are interested in exploring career options and further educational opportunities and are committed to completing high school. The ultimate goal is to help participants graduate, explore post-secondary education and/or training, and secure a quality job, which will lead to a good career. The course includes instruction in thirty-seven competencies identified by the business community and involvement in the Tennessee Career Association student organization, one-on-one marketing and job development by the instructor for employment leading to a career, and no less than twelve months of follow-up and support on the job after leaving school.

## YEARBOOK - Course \# G01H15

1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$
Prerequisite: Students must complete an application and have 2 teacher recommendations.
Yearbook is an elective course that gives students marketable experience in print media publishing. This course solely works toward the completion and selling of a large finished product, Dickson County High School's yearbook. Yearbook class is different from normal classes in high school in that it is a real business maintaining an account that must balance-out at the end of the school year. In class, students compose, construct, and edit all elements of computerized text layout, graphic art, and digital photography. Students work on many clerical operations, make announcements, maintain signs, conduct student polls, take photos, and write articles. The course in turn covers many of the content standards and objectives encountered in English courses, as does it also for objectives of art, business, and computer technology courses. Because Yearbook is a monetary business, students must cooperatively work with others, must be hardworking, and be eager to be creative. Out of class and after school, students will shoot digital photos, sell and design advertising, and distribute yearbook order forms. Students are responsible for the proper care and handling of all equipment used in the course. Pairs or groups of students should expect to spend some of their time before and after school as well working on computerized yearbook pages. This course also examines legal and ethical issues of media law and copyright. Help capture the moments of your high school career while learning marketable skills for the workplace.

## WELLNESS \& PHYSICAL EDUCATION

Note: Students may take ONE credit (2 courses - $1 / 2$ credit each) of PE each year. The credits do not have to be in the same class.

## AEROBICS - FALL - Course \# G08H00AS1 <br> $1 / 2$ Credit: $10^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$

The objectives of an Aerobics class are to provide each student with the knowledge of why it is important to be physically fit and to give them an opportunity to improve their fitness level through daily exercise and activities. Each student will have the opportunity to learn and practice specific workouts that improve certain aspects of their health, such as their cardiovascular endurance, muscular fitness, flexibility, body composition and eating habits. Aerobics will give students the opportunity to acquire important life skills such as teamwork, sportsmanship and a positive attitude about themselves and others. Our main goal is for students to take what they learn and use it out in the community and U.S.

## AEROBICS - SPRING - Course \# G08H00AS2

$$
\underline{1 / 2} \text { Credit: } 10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}
$$

## LIFETIME FITNESS - FALL - Course \# G08H00LS1

## $1 / 2$ Credit: $\mathbf{1 0}^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

This course will focus on activities that a student can pursue in his/her adult life in order to maintain a level of physical and mental fitness. Swimming, Tennis, Badminton, Aerobics, Basketball, Power Walking and body weight exercises are some examples of the activities included in this course. This class will require each student to dress out in order to participate.

LIFETIME FITNESS - SPRING - Course \# G08H00LS2

$$
1 / 2 \text { Credit: } \mathbf{1 0}^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}
$$

This course will focus on activities that a student can pursue in his/her adult life in order to maintain a level of physical and mental fitness. Swimming, Tennis, Badminton, Aerobics, Basketball, Power Walking and body weight exercises are some examples of the activities included in this course. This class will require each student to dress out in order to participate.

## LIFETIME WELLNESS - Course \# G08H02

$$
1 \text { Credit: } 9^{\text {th }}, 10^{\text {th }}
$$

Lifetime Wellness is a holistic approach to health and lifetime physical activities in Tennessee high schools. This approach to total wellness encompasses the physical, mental, social, and emotional wellbeing of the individual. Students will be required to dress out during this class. This course is a graduation requirement unless you substitute two (2) years of JROTC.

## WEIGHT TRAINING - FALL - Course \# G08H01WS1 <br> $1 / 2$ Credit: $\mathbf{1 0}^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$

This class meets for roll each day in the main gym. We will go down to the Field House except for days when there is really bad weather. Expect to lift weights if you take this class. We will do various workouts on different days for a total body workout. Dressing out is not required, but we recommend at least bringing a change of shirt each day.

Grading is based on 3 criteria: Attendance, Participation and Max Gains.
-1 point off attendance per each day absence
-1 point off participation for each day not participating
Max Gains: Required to go up 10 lbs . from one max out to the next.
Grades are as follows: $+10=100,+5=95$, stay same $=90,-5-85,-10=80$ and so on.

## WEIGHT TRAINING - SPRING - Course \# G08H01WS2

# The DCHS Junior Reserve Officer Training Corps (JROTC) is: A Character and Leadership Development Program 

Citizenship<br>Civics<br>Economics<br>Geography<br>Health

## Curriculum focuses on:

Language Arts Self-Regulation
Leadership Skills
Life Skills
Life Work
Physical Fitness

Public Speaking
Thinking and Reasoning
U.S. History

Working with Others

## JROTC Enrollment Requirements

Enrollment in this program is voluntary. Students/perspective cadets must be enrolled in and attending DCHS as a full-time student.

Once enrolled, Cadets must:

- Maintain an acceptable standard of academic achievement and standing as required by the JROTC Department and DCHS.
- Maintain an acceptable standard of conduct, comply with the JROTC grooming standards and be physically capable to participate in the physical education program.
- Agree to wear the Army JROTC uniform one school day per week.

## JROTC Course Substitutions/Equivalency Credits:

- JROTC (2 years) for Lifetime Wellness ( 1 credit) and Physical Education ( $1 / 2$ credit)
- JROTC ( 3 years) for U.S. Government ( $1 / 2$ credit) and Personal Finance ( $1 / 2$ credit)

## JROTC Leadership and Education I (LET 1) - Course \# G08H04

## 1 Credit: Level 1-1 ${ }^{\text {st }}$ Year

LET 1 is the entry-level course of the Junior Reserve Officer Training Corps Program and teaches Cadets the value of citizenship, leadership service to the community, personal responsibility and a sense of accomplishment while instilling in them self-esteem, teamwork, and self-discipline. The program promotes graduation from high school by providing curriculum, Leadership and Education Training (LET), and rewarding opportunities that benefit the student, community and the nation both in the present and the future. LET 1 Cadets can expect to assume entry-level leadership positions in DCHS's Corps of Cadets.

## JROTC Leadership and Education II (LET 2) - Course \# G08H05 <br> 1 Credit: Level 2-2 ${ }^{\text {nd }}$ Year <br> Prerequisite: Successful completion of LET Level 1

LET 2 of the Junior Reserve Officer Training Corps Program broadens a Cadet's knowledge and understanding of citizenship, leadership, service to the Community, and personal responsibility. The curriculum expands beyond the LET 2 focus areas and includes, Health/Lifestyle Awareness, First Aid, Drug Awareness, Map Reading/Orienteering, Geography, Environmental Awareness, Citizenship Skills, and the History and Operations of the U.S. Government. LET 2 Cadets continue to build selfesteem, teamwork, and self-discipline and work to assume greater positions of responsibility as leaders in DCHS's Corps of Cadets.

# JROTC Leadership and Education III (LET 3) - Course \# G08H06 

## 1 Credit: Level 3-3 ${ }^{\text {rd }}$ Year <br> Prerequisites: Successful completion of LET 1 and LET 2

LET 3 of the Junior Reserve Officer Training Corps sharpens a Cadet's knowledge and understanding of leadership principles, planning, goal-setting, and leadership strategies, as well as decision making and problem-solving skills. LET 3 Cadets develop stronger writing and presentation skills, conflict management skills and begin exploring time management, career planning and financial planning strategies. LET 3 Cadets continue to develop as leaders, both physically and mentally and work to assume greater positions of responsibility as leaders in DCHS's Corps of Cadets. This course meets the U.S. Government/Civics and Personal Finance graduation requirements. Students in this class are required to take the US Civics/Citizenship Test, which is a graduation requirement.

## JROTC Leadership and Education IV (LET 4) - Course \# G08H07 <br> 1 Credit: Level 4-4 ${ }^{\text {th }}$ Year <br> Prerequisites: Successful completion of LET 1, LET 2 and LET 3

LET 4 of the Junior Reserve Officer Training Corps Program is the capstone level of a Cadet's high school JROTC leadership and education. Cadets further expand their knowledge and understanding of leadership, leadership strategies and principles, and work to enhance their decision making and problem solving skills. LET 4 Cadets receive additional instruction in Financial Planning and develop skills in teaching and delivering instructions, to include lesson plans, presentations, and the use of Thinking Maps and Graphic Organizers. LET 4 Cadets, having benefited from 3 years of experience in the JROTC Program; usually assume the top leadership positions in the DCHS Corps of Cadets. Throughout the LET 4 year, Cadets earnestly plan and prepare for education opportunities after high school graduation.

Do you enjoy working with plants and animals?
Do you like to build things?
Do you pay attention to small details?
Are you good at understanding mechanics?
Are you interested in medicine or dentistry?
Are you fascinated by technology?
If you answered yes to any of these questions, then a Career and Technical program may be just for you!

Career and Technical courses offer students the opportunity to learn and use real-world skills in the classroom. Students will then be able to utilize these skills in the workplace after graduation, or pursue additional education and training at a post-secondary institution. Taking Career and Technical
courses also gives each student a better understanding about the different career choices that are available after they complete high school. Explore a Career and Technical program and find your passion!

## Course offerings are available in the following focus areas.

1) Agriculture
a. Agricultural Engineering and Applied Technologies
b. Horticulture Science
c. Veterinary and Animal Science
2) Architecture and Construction
a. Architectural \& Engineering Design
b. Residential \& Commercial Construction
3) Arts, Audio/Visuals Technology, \& Communications
a. Digital Arts \& Design
4) Business Management \& Administration
a. Business Management
5) Education \& Training
a. Teaching as a Profession (K-12)
6) Health Science
a. Nursing Services
b. Therapeutic Services
7) Human Services
a. Dietetics and Nutrition
8) Law, Public Safety, Corrections, \& Security a. Criminal Justice and Correction Services
9) Science, Technology, Engineering \& Math (STEM)
a. Technology
10) Transportation, Distribution, \& Logistics a. Automotive Maintenance and Light Repair
**Depending upon space availability, there will be a limited number of seats available for classes at the Tennessee College of Applied Technology (TCAT). Students may have the option to attend these classes for dual credit. A complete listing of TCAT courses offered through Dickson County High School are listed on page 35 of this registration bulletin. Arrangements must be made through the school counselor. Career and Technical Student Organizations (CTSOs) are an integral part of each career course. They are designed to develop personal and leadership qualities in students.
**Nashville State Community College offers dual credit opportunities for students to receive college credit after completing a Career and Technical course. For information about specific dual credit opportunities, see the list at the end of the Career and Technical section of this guide.

## CTE COURSE OFFERINGS \& DESCRIPTIONS

## JOBS FOR TENNESSEE GRADUATES (JTG) - Course \# C25H09

## 1 Credit: $\mathbf{1 2}^{\text {th }}$

This course is for seniors who are interested in exploring career options and further educational opportunities and are committed to completing high school. The ultimate goal is to help participants graduate, explore post-secondary education and/or training, and secure a quality job, which will lead to a good career. The course includes instruction in thirty-seven competencies identified by the business community and involvement in the Tennessee Career Association student organization, one-on-one marketing and job development by the instructor for employment leading to a career, and no less than twelve months of follow-up and support on the job after leaving school.

## AGRICULTURE

Student Organization -- Future Farmers of America FFA
This Agriculture program of study prepares students for careers in the planning, implementation, production, management, processing and/or marketing of agricultural commodities and services. This
includes food, fiber, wood products, natural resources, horticulture, and other plant and animal products. It also includes related professional, technical and educational services.

Employment opportunities will continue to increase for those who provide and market an expanding array of food, forest, and veterinary medical consumer products to a growing world population. Continued globalization of the food, agricultural and natural resources system will increase opportunities for graduates who understand the socio-economic factors that define international markets. Graduates who know how to satisfy the diverse consumer needs and preferences in different cultures, and who have the language skills to communicate effectively, will have the best opportunities to be employed by the growing number of multinational businesses.

## VETERINARY AND ANIMAL SCIENCE PROGRAM OF STUDY

## AGRISCIENCE - Course \# C18H19

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Agriscience is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and post-secondary study. This course helps students understand the important role that agricultural science and technology plays in the twenty-first century. In addition, it serves as the first course for all programs of study in the Agriculture, Food, \& Natural Resources cluster. Upon completion of this course, proficient students will be prepared for success in more advanced agriculture and science coursework. This course counts as a lab science credit toward graduation

## SMALL ANIMAL SCIENCE - Course \# C18H20 <br> 1 Credit: $10^{\text {th }}, \mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Agriscience

Small Animal Science is an intermediate course in animal science and care for students interested in learning more about becoming a veterinarian, vet tech, vet assistant, or pursuing a variety of scientific, health, or agriculture professions. This course covers anatomy and physiological systems of different groups of small animals, as well as careers, leadership, and history of the industry. Upon completion of this course, proficient students will be prepared for more advanced coursework in veterinary and animal science.

## LARGE ANIMAL SCIENCE - Course \# C18H27 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Small Animal Science

Large Animal Science is an applied course in veterinary and animal science for students interested in learning more about becoming a veterinarian, vet tech, vet assistant, or pursuing a variety of scientific, health, or agriculture professions. This course covers anatomy and physiological systems of different groups of large animals, as well as careers, leadership, and history of the industry. Upon completion of this course, proficient students will be prepared for success in the level-four Veterinary Science course and further post-secondary training. Large Animal Science is a Local Dual Credit (3 Hours) course with MTSU. Ask the teacher for more information.

# VETERINARY SCIENCE - Course \# C18H21 

1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Large Animal Science and Teachers Recommendation.

Veterinary Science is an advanced course in animal science and care for students interested in learning more about becoming a veterinarian, vet tech, vet assistant, or pursuing a variety of scientific, health, or agriculture professions. This course covers principles of health and disease, basic animal care and nursing, clinical and laboratory procedures, and additional industry-related career and leadership knowledge and skills. Upon completion of this course, students will be able to pursue advanced study of veterinary science at a post-secondary institution.

## WORK-BASED LEARNING - Veterinary \& Animal - Course \# C18H66

## 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## HORTICULTURE SCIENCE PROGRAM OF STUDY

## AGRISCIENCE - Course \# C18H19

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Agriscience is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and post-secondary study. This course helps students understand the important role that agricultural science and technology plays in the twenty-first century. In addition, it serves as the first course for all programs of study in the Agriculture, Food, \& Natural Resources cluster. Upon completion of this course, proficient students will be prepared for success in more advanced agriculture and science coursework. This course counts as a lab science credit toward graduation requirements.

## PRINCIPLES OF PLANT SCIENCE AND HYDROCULTURE Course \# C18H30 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ Prerequisite: Agriscience

Principles of Plant Science and Hydroculture focuses on essential knowledge and skills related to the science of plant growth. This course covers principles of plant health, growth, reproduction, and biotechnology, as well as fundamental principles of hydroponics and aquaponics. Upon completion of this course, proficient students will be prepared for more advanced coursework in horticulture science.

## GREENHOUSE MANAGEMENT - Course \# C18H17

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Agriscience \& Principles of Plant Science \& Hydroculture
Greenhouse Management is an applied-knowledge course designed to prepare students to manage greenhouse operations. This course covers principles of greenhouse structures, plant health and growth, growing media, greenhouse crop selection and propagation, and management techniques. Upon completion of this course, proficient students will be equipped with the technical knowledge and skills needed to prepare for further education and careers in horticulture production. Greenhouse Management
is a dual credit course with statewide articulation. Greenhouse Management is a Local Dual Credit (3 Hours) course with MTSU. Ask the teacher for more information.

## WORK-BASED LEARNING - Horticulture - Course \# C18H65

## 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## AGRICULTURAL ENGINEERING, INDUSTRIAL, AND MECHANICAL SYSTEMS PROGRAM OF STUDY

## AGRISCIENCE - Course \# C18H19

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Agriscience is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and post-secondary study. This course helps students understand the important role that agricultural science and technology plays in the twenty-first century. In addition, it serves as the first course for all programs of study in the Agriculture, Food, \& Natural Resources cluster. Upon completion of this course, proficient students will be prepared for success in more advanced agriculture and science coursework. This course counts as a lab science credit toward graduation requirements.

## PRINCIPLES OF AGRICULTURAL MECHANICS - Course \# C18H12 1 Credit: $10^{\text {th }}, 11^{\text {th }}$ <br> Prerequisite: Agriscience

Principles of Agricultural Mechanics is an intermediate course introducing students to basic skills and knowledge in construction and land management for both rural and urban environments. This course covers topics including project management, basic engine and motor mechanics, land surveying, irrigation and drainage, agricultural structures, and basic metalworking techniques. Upon completion of this course, proficient students will be prepared for more advanced coursework in agricultural mechanics.

## AGRICULTURAL POWER AND EQUIPMENT - Course \# C18H13

## 1 Credit: 11 ${ }^{\text {th }}$

Prerequisite: Agriscience \& Principles of Agricultural Mechanics
Agricultural Power and Equipment is an applied course in agricultural engineering with special emphasis on laboratory activities involving small engines, tractors, and agricultural equipment. The standards in this course address navigation, maintenance, repair, and overhaul of electrical motors, hydraulic systems, and fuel powered engines as well as exploration of a wide range of careers in Page 2 agricultural mechanics. Upon completion of this course, proficient students will be able to pursue advanced training in agricultural engineering and related fields at a post-secondary institution.

## WORK-BASED LEARNING Engineering \& Mechanics - Course \# C18H62 <br> 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## ARCHITECTURE AND CONSTRUCTION

## Student Organization - Skills USA

Architecture and Construction program of study prepares students for careers in designing, planning, managing, building and maintaining the building environment. People employed in this cluster work on new structures, restorations, additions, alterations and repairs.

Architecture and construction comprise one of the largest industries in the United States. Based on the latest statistics, this career cluster has 13.8 million jobs. In the next few years, many new jobs will be added and many employment opportunities will result from the need to replace experienced workers who leave jobs.

Architect<br>Building inspector<br>Civil engineer<br>Construction worker<br>Contractor

Drywall installer
Electrician
Heavy equipment operator
Plumber
Surveyor

## RESIDENTIAL \& COMMERCIAL CONSTRUCTION PROGRAM OF STUDY

## FUNDAMENTALS OF CONSTRUCTION - Course \# C17H15

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Fundamentals of Construction is a foundational course in the Architecture \& Construction cluster covering essential knowledge, skills, and concepts required for careers in construction. Upon completion of this course, proficient students will be able to describe various construction fields and outline the steps necessary to advance in specific construction careers. Students will be able to employ tools safely and interpret construction drawings to complete projects demonstrating proper measurement and application of mathematical concepts. Standards in this course also include an overview of the construction industry and an introduction to building systems and materials. Course fee $\mathbf{\$ 5 . 0 0}$

## RESIDENTIAL/COMMERCIAL CONSTRUCTION I - Course \# C17H24

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Required Prerequisites: Fundamentals of Construction

Residential \& Commercial Construction I is the second course in the Residential \& Commercial Construction program of study intended to prepare students for careers in construction by developing an understanding of the different phases of a construction project from start to finish. Upon completion of this course, proficient students will be able to demonstrate knowledge and skill in the earlier phases of building construction, including site layout, foundation systems, concrete, framing systems, and
electrical systems. Students will be able to perform concrete work; frame walls, ceilings, and floors of a structure; and install proper wiring while safely employing tools and interpreting construction drawings to complete projects. Emphasis is placed on demonstrating proper measurement and application of mathematical concepts. Standards in this course also include principles of the construction industry and business and project management. Students will continue compiling artifacts for inclusion in their portfolios, which they will carry with them throughout the full sequence of courses in this program of study. Course fee $\mathbf{\$ 5 . 0 0}$

## RESIDENTIAL/COMMERCIAL CONSTRUCTION I DUAL ENROLLMENT TCAT Course \# C17H01 <br> 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$ <br> Required Prerequisites: Fundamentals of Construction

Residential \& Commercial Construction I is the second course in the Residential \& Commercial Construction program of study intended to prepare students for careers in construction by developing an understanding of the different phases of a construction project from start to finish. Upon completion of this course, proficient students will be able to demonstrate knowledge and skill in the earlier phases of building construction, including site layout, foundation systems, concrete, framing systems, and electrical systems. ## RESIDENTIAL/COMMERCIAL CONSTRUCTION II - Course \# C17H25 2 Credits: $\mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Required Prerequisite: Residential Construction I

Residential \& Commercial Construction II is the third course in the Residential \& Commercial Construction program of study intended to prepare students for careers in construction by developing an understanding of the different phases of a construction project from start to finish. Upon completion of this course, proficient students will be able to demonstrate knowledge and skill in the later phases of building construction including roofing systems, exterior finishing, stair framing systems, masonry systems, and plumbing systems. Students will be able to perform masonry work; frame roofs; install shingles on roofs; apply exterior finishes; and install proper piping for plumbing systems while safely employing tools and interpreting construction drawings to complete projects. Emphasis is placed on demonstrating proper measurement and application of mathematical concepts. Standards in this course also include an introduction to heating, ventilation, and air conditioning systems, principles of the construction industry, and business and project management. Students will continue compiling artifacts for inclusion in their portfolios, which they will carry with them throughout the full sequence of courses in this program of study. Course fee $\mathbf{\$ 5 . 0 0}$

# RESIDENTIAL/COMMERCIAL CONSTRUCTION II DUAL ENROLLMENT TCAT 

## Course \# C17H31

2 Credits: $11^{\text {th }}, 12^{\text {th }}$

## Required Prerequisite: Residential Construction DE I

## ARCHITECTURAL \& ENGINEERING DESIGN PROGRAM OF STUDY

## ARCHITECTURAL \& ENGINEERING DESIGN I (CAD I) - Course \# C17H13

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Architectural \& Engineering Design I is a foundational course in the Architecture \& Construction cluster for students interested in a variety of engineering and design professions. Upon completion of this course, proficient students will be able to create technical drawings of increasing complexity, and utilize these skills to complete the design process and communicate project outcomes. Students will build foundational skills in freehand sketching, fundamental technical drawing, and related measurement and math. Standards in this course also include career exploration within the technical design industry, as well as an overview of the history and impact of architecture and engineering. In addition, students will begin compiling artifacts for inclusion in a portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

## ARCHITECTURAL \& ENGINEERING DESIGN I (CAD I) Dual Enrollment TCAT Course \# C17H04 <br> 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Architectural \& Engineering Design I is a foundational course in the Architecture \& Construction cluster for students interested in a variety of engineering and design professions. # ARCHITECTURAL \& ENGINEERING DESIGN II (CAD II) - Course \# C17H14 

1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$
Prerequisite: CAD I
Architectural \& Engineering Design II is the second course in the Architectural \& Engineering Design program of study. Students in this course build their skills in developing and representing design ideas using technical drawing and modeling techniques, and apply the design process to solve design problems. Upon completion of this course, proficient students will be able to use computer-aided drafting (CAD) software to create multi-view, sectional view, auxiliary view, and three-dimensional drawings using industry standard dimensioning and notation. Students will connect drawings with actual physical layouts by building models based on drawings, creating drawings based on objects and other physical layouts, and using software to create basic three-dimensional models. In addition, students will continue compiling artifacts for inclusion in a portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

ARCHITECTURAL \& ENGINEERING DESIGN II (CAD II) Dual Enrollment TCAT Course \# C17H28<br>1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$<br>Prerequisite: CAD I or CAD I DE

## ARCHITECTURAL \& ENGINEERING DESIGN III (CAD III) Course \# C17H10

## 2 Credits: $11^{\text {th }}, 12^{\text {th }}$ Prerequisite: CAD II

Architectural \& Engineering Design III is the third course in the Architectural \& Engineering Design program of study. In this advanced course, students will apply technical drawing and design skills developed in the previous courses to specific architectural and mechanical design projects and contexts. In the process, students will expand their problem-solving and critical-thinking skills by assessing the requirements of a project alongside the available resources in order to accomplish realistic planning. Upon completion of this course, proficient students will be able to employ methods of data collection and analysis to provide others with appropriate information for projects and to develop their own designs. Students will also be able to engage with industry-specific technology to create visual representations of project outcomes. In addition, students will continue compiling artifacts for inclusion in a portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

## ARCHITECTURAL \& ENGINEERING DESIGN III (CAD III) Dual Enrollment TCAT Course \# C17H35 <br> 2 Credits: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: CAD DE II

## ARTS, A/V TECHNOLOGY \& COMMUNICATIONS

## Student Organization - Skills USA

In the Digital Arts Design Program, you will learn real-world design skills in areas such as the principles and elements of design and the design process. Most observers expect the job growth rate within AV industries to be at 20-30 percent for the foreseeable future. Here are just a few of the career opportunities for Digital Arts Design.

Graphic Designer Illustrator

Photographer
Web Media Design

## DIGITAL ARTS DESIGN PROGRAM OF STUDY

## DIGITAL ARTS \& DESIGN I - Course \# C11H06

1 Credit: $9^{\text {th }}, 10^{\text {th }}$
Digital Arts \& Design I is a foundational course in the Arts, A/V Technology, \& Communications cluster for students interested in art and design professions. The primary aim of this course is to build a strong understanding of the principles and elements of design and the design process. Upon completion of this course, proficient students will be able to utilize industry tools to conceptualize and create communications solutions which effectively reach targeted audiences. Students will acquire basic skills in illustration, typography, and photography. Standards in this course include career exploration, an overview of the history of design, basic business management, and legal issues. In addition, students will begin compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study. This class offers Adobe Professional Industry Certification.

## DIGITAL ARTS \& DESIGN I DUAL ENROLLMENT TCAT - Course \# C11H08

## 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }}$

Digital Arts \& Design I is a foundational course in the Arts, A/V Technology, \& Communications cluster for students interested in art and design professions. The primary aim of this course is to build a strong understanding of the principles and elements of design and the design process. Upon completion of this course, proficient students will be able to utilize industry tools to conceptualize and create
communications solutions, which effectively reach targeted audiences. Students will acquire basic skills in illustration, typography, and photography. Standards in this course include career exploration, an overview of the history of design, basic business management, and legal issues. In addition, students will begin compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study. This class offers Adobe Professional Industry Certification.

## DIGITAL ARTS \& DESIGN II - Course \# C11H05

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Digital Arts I

Digital Arts \& Design II is a course that builds on the basic principles and design process learned in the introductory Digital Arts \& Design I course. Upon completion of this course, proficient students will be able to perform advanced software operations to create photographs and illustrations of increasing complexity. Students will employ design principles and use industry software to create layouts for a variety of applications. Standards in this course also include an overview of art and design industries, career exploration, and business management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study. This class offers Adobe Professional Industry Certification.

## DIGITAL ARTS \& DESIGN II DUAL ENROLLMENT TCAT - Course \# C11H09

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Digital Arts I DE

Digital Arts \& Design II is a course that builds on the basic principles and design process learned in the introductory Digital Arts \& Design I course. Upon completion of this course, proficient students will be able to perform advanced software operations to create photographs and illustrations of increasing complexity. Students will employ design principles and use industry software to create layouts for a variety of applications. Standards in this course also include an overview of art and design industries, career exploration, and business management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

## DIGITAL ARTS \& DESIGN III - Course \# C11H16 <br> 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Digital Arts II

Digital Arts \& Design III is the third course in the Digital Arts \& Design program of study. Applying design skills developed in prior courses, students will expand their creative and critical thinking skills to create comprehensive multimedia projects and three-dimensional designs. Upon completion of this course, proficient students will be able to use industry-standard software to create multimedia projects, web pages, three-dimensional models, and animations. Students will utilize research techniques to plan and enhance project outcomes. Standards in this course also include professionalism and ethics, career exploration, and business and project management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study. This class offers Adobe Professional Industry Certification.

## DIGITAL ARTS \& DESIGN III DUAL ENROLLMENT TCAT - Course \# C11H20

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Prerequisite: Digital Arts DE II

Digital Arts \& Design III is the third course in the Digital Arts \& Design program of study. Applying design skills developed in prior courses, students will expand their creative and critical thinking skills to create comprehensive multimedia projects and three-dimensional designs. Upon completion of this
course, proficient students will be able to use industry-standard software to create multimedia projects, web pages, three-dimensional models, and animations. Students will utilize research techniques to plan and enhance project outcomes. Standards in this course also include professionalism and ethics, career exploration, and business and project management. In addition, students will continue compiling artifacts for inclusion in a digital portfolio, which they will carry with them throughout the full sequence of courses in this program of study.

## APPLIED ARTS PRACTICUM - Digital Arts \& Design - Course \# C11H07 2 Credits: 12 $^{\text {th }}$

## Prerequisite - Digital Arts III. Students must apply for WBL and be approved by Ms. Russell

The Applied Arts Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Arts, A/V Technology, \& Communications courses within a professional, working environment. In addition to developing an understanding of the professional and ethical issues encountered by professionals in these careers, students learn to refine their skills in problem-solving, research, communication, teamwork, and project management through the completion of a course-long project. The course is highly customizable to meet local system needs. Instruction may be delivered through school laboratory training or through work-based learning arrangements such as internships, service learning, and job shadowing. Upon completion of the practicum, proficient students will be prepared to pursue postsecondary study in arts, A/V technology, or communications programs; or seek additional training or employment with the aid of the portfolio, which documents the student's work completed throughout the program of study.

## WORK-BASED LEARNING - Digital Arts \& Design - Course \# C11H26

## 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## BUSINESS MANAGEMENT AND ADMINISTRATION

## Student Organization - Future Business Leaders of America (FBLA)

The Business, Management and Administration program of study prepares students for careers in planning, organizing, directing and evaluating business functions essential to efficient and productive business operations. Career opportunities are available in every sector of the economy and require specific skills in organization, time management, customer service and communication.

The business management and administration services industry is projected to be one of the fastest growing career fields. Nearly half of all jobs are in managerial and professional occupations, and nearly one-fourth of all workers are self-employed. The business management and administration services industry is one of the highest-paying industries. In the next few years, many new jobs will be added and many openings will result from the need to replace experienced workers who leave jobs.

# BUSINESS MANAGEMENT PROGRAM OF STUDY 

## INTRODUCTION TO BUSINESS \& MARKETING

## Course \# C12H26 <br> 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Introduction to Business and Marketing is an introductory course designed to give students an overview of the Business Management and Administration, Marketing, and Finance career clusters. The course helps students prepare for the growing complexities of the business world by examining basic principles of business, marketing, and finance in addition to exploring key aspects of leadership, ethical and social responsibilities, and careers. Students' academic skills in communications, mathematics, and economics are reinforced with activities modeled in the context of business topics. Upon completion of this course, proficient students will be equipped with the foundational skills to succeed in any of the Business, Marketing, or Finance programs of study and will be prepared to make an informed decision regarding which pathways they would like to pursue in high school.

## ACCOUNTING I - Course \# C29H00

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Introduction to Business \& Marketing

Accounting I is an essential course for students who wish to pursue careers in business and finance, or for those who wish to develop important skillsets related to financial literacy. Whether students aspire to be future business owners or work in finance with other companies, accounting skills are fundamental to success and applicable in many different fields. In this course, proficient Accounting students develop skills to analyze business transactions, journalize, post, and prepare worksheets and financial statements, and apply financial analysis to business processes. Additionally, students receive exposure to the ethical considerations that accounting professionals must face and the standards of practice governing their work, such as the GAAP (generally accepted accounting procedures) standards. Upon completion of this course, proficient students will be prepared to apply their accounting skills in more advanced Business and Finance courses, and ultimately pursue post-secondary training.

## BUSINESS COMMUNICATIONS - Course \# C12H16 <br> 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Introduction to Business \& Marketing

Business Communications is a course designed to develop students' effective oral and electronic business communications skills. This course develops skills in multiple methods of communications, including social media, as well as electronic publishing, design, layout, composition, and video conferencing. Upon completion of this course, proficient students will be able to demonstrate successful styles and methods for professional business communications using the proper tools to deliver effective publications and presentations.

## BUSINESS MANAGEMENT - Course \# C12H17 <br> 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Introduction to Business \& Marketing

Business Management focuses on the development of the planning, organizing, leading, and controlling functions required for the production and delivery of goods and services. This applied knowledge course addresses the management role of utilizing the businesses' resources of employees, equipment, and capital to achieve an organization's goals. Students will participate in a continuing project throughout the course in which, individually or in teams, they will present recommendations to improve an existing business. Local business partnerships are encouraged to provide resources for faculty and students. Upon completion of this course, proficient students will be able to complete a full review of an existing business and offer recommendations for improvement as would a management consultant.

## WORK-BASED LEARNING - Business Management - Course \# C12H61

## 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## EDUCATION AND TRAINING

Student Organization-Family, Career, and Community Leaders of America (FCCLA)
This Career Cluster prepares learners for careers in planning, managing and providing education and training services and related learning support services. Millions of people each year prepare for careers in education and training in a variety of settings that offer academic instruction, vocational and technical instruction, and other education and training services.

A growing emphasis on improving education and making it available to more Americans will increase the overall demand for workers in the Education and Training Cluster. Employers are expected to devote greater resources to job-specific training programs in response to the increasing complexity of many jobs, the aging of the work force, and technological advances that can leave employees with obsolete skills. This will result in particularly strong demand for training and development specialists across all industries.

## TEACHING AS A PROFESSION (K-12) PROGRAM OF STUDY

## INTRODUCTION TO TEACHING AS A PROFESSION - Course \# C32H33

## 1 Credit: $\mathbf{9}^{\text {th }}, 10^{\text {th }}$

Fundamentals of Education is a foundational course in the Teaching as a Profession program of study for students interested in learning more about becoming a teacher, school counselor, trainer, librarian, or speech-language pathologist. Upon completion of this course, proficient students will Page 2 gain knowledge in the history of education in the United States, careers in education, and the influence of human development on learning. Artifacts will be created for inclusion in a portfolio, which will continue throughout the full sequence of courses.

## TEACHING AS A PROFESSION I - Course \# C32H01

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

Prerequisite: Fundamentals of Education
Teaching as a Profession I (TAP I) is an intermediate course for students interested in learning more about becoming a teacher, school counselor, trainer, librarian, or speech-language pathologist. This course covers the components of instruction, teaching strategies, types of assessments, student learning, special populations, and educational technology. Students will conduct observations of educators at work and create artifacts for a course portfolio, which will continue with them throughout the program of
study. Upon completion of this course, proficient students will have a fundamental understanding of instructional strategies needed for becoming an educator.

## TEACHING AS A PROFESSION II - Course \# C32H02 <br> 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Teaching as a Profession I

Teaching as a Profession II (TAP II) is an applied-knowledge course for students interested in learning more about becoming a teacher, school counselor, librarian, or speech-language pathologist. This course covers classroom management, concepts of higher order thinking, differentiating instruction, and strategies of effective classroom planning. Students in this course will demonstrate their skills in laboratory settings while building a course portfolio of work, which will carry with them throughout the program of study.

## FOUNDATIONS OF EDUCATION (K-12) I DUAL ENROLLMENT - Course \# C32H04

 1 Credit: $11^{\text {th }}, 12^{\text {th }}$
## Prerequisite: Teaching as a Profession I or Mrs. Akins Approval. Students must meet the APSU

 Dual Enrollment admissions criteria of 3.0 HS GPA or 21 ACT Composite.Students who successfully complete this course will receive 2 credit hours for Austin Peay State University's EDUC 2100: Foundations of Education course. This course will cover the social, philosophical and historical background of education as well as the integration of standards-based instruction. The course will contain lecture/discussion and practical activities that allow students to demonstrate mastery of material. Students will be trained on the state's Code of Ethics; the different roles of effective teachers; learning styles; teaching diverse students; curriculum, standards and testing; and student life in school and at home. Students may be permitted to observe periodically at a local school.

## INTRO TO EARLY CHILDHOOD EDUCATION (K-12) II DUAL ENROLLMENT Course \# C32H05 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Teaching as a Profession I or Mrs. Akins Approval. Students must meet the APSU Dual Enrollment admissions criteria of 3.0 HS GPA or 21 ACT Composite.
Students who successfully complete this course will receive 3 credit hours for Austin Peay State University's EC 2200: Introduction to Early Childhood Education course. This course will introduce the historical and theoretical influences upon early childhood education. Legal, ethical, health and safety, and professional issues impacting the care and education of children, birth through age eight. Orientation to early childhood teacher education licensure program and the early childhood profession, including leadership and management of program for young children and their families. Students may be permitted to participate in job shadowing experience at a local elementary school.

## WORK-BASED LEARNING - Teaching as a Profession (K-12) - Course \# C32H36 2 Credits: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## Student Organization-HOSA - Future Health Professionals

Health Services is one of the largest industries in the country, with more than 11 million jobs, including the self-employed. The health services industry includes establishments ranging from small-town private practice physicians who employ only one medical assistant to busy inner city hospitals that provide thousands of diverse jobs. More than half of all non-hospital health service establishments employ fewer than five workers. On the other hand, almost two-thirds of hospital employees were in establishments with more than 1,000 workers.

## NURSING SERVICES PROGRAM OF STUDY

## HEALTH SCIENCE EDUCATION - Course \# C14H14

## 1 Credit: $\mathbf{9}^{\text {th }}, \mathbf{1 0}^{\text {th }}$

Health Science Education is an introductory course designed to prepare students to pursue careers in the fields of biotechnology research, therapeutics, health informatics, diagnostics, and support services. Upon completion of this course, a proficient student will be able to identify careers in these fields, compare and contrast the features of healthcare systems, explain the legal and ethical ramifications of the healthcare setting, and begin to perform foundational healthcare skills. This course will serve as a strong foundation for all of the Health Science programs of study.

## ANATOMY AND PHYSIOLOGY - Course \# C14H09

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

## Pre-requisite: Health Science Education

Anatomy and Physiology is an upper level course designed to develop an understanding of the structures and functions of the human body, while relating those to knowledge and skills associated with pathophysiology. Upon completion of this course, proficient students will be able to (1) apply the gross anatomy from earlier courses to a deeper understanding of all body systems, (2) identify the organs and structures of the support and movement systems, (3) relate the structure and function of the communication, control, and integration system, and (4) demonstrate a professional, working understanding of the transportation, respiration, excretory, and reproduction systems. NOTE: The class fee for this course is $\mathbf{\$ 2 5}$.

## MEDICAL THERAPEUTICS - Course \# C14H15

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Prerequisite: Health Science Education, and Anatomy \& Physiology

Medical Therapeutics is an applied course designed to prepare students to pursue careers in therapeutic services. Upon completion of this course, a proficient student will be able to identify careers in therapeutics services; assess, monitor, evaluate, and report patient/client health status; and identify the purpose and components of treatments. Students will be Basic Life Support (BLS) certified.

2 Credits: 12 ${ }^{\text {th }}$
Prerequisites: Students must have successfully completed a course in Medical Therapeutics, Pharmacological Services, or Medical Diagnostics; must provide their own clinical uniforms and transportation to clinical site. APPLICATION REQUIRED - Class size limited to 15 students. Clinical Internship is a capstone course and work-based learning experience designed to provide students with real-world application of skills and knowledge obtained in a pre-requisite Health Science courses. Upon completion of this course, students will be able to sit for the Certified Patient Care Tech Certification (CPCT) Exam. Prior to beginning work at a clinical site, students must be certified in Basic Life Support (BLS) Cardiopulmonary Resuscitation (CPR), and deemed competent in basic first aid, body mechanics, Standard Precaution guidelines, and confidentiality. Note: Student to teacher ratio for this course is $15: 1$ in a clinical setting. NOTE: Admission to this class is subject to junior year application process, teacher evaluations, GPA, discipline and attendance records. Students must maintain $90 \%$ attendance while participating in clinicals.

## PATIENT CARE TECHNICIAN - Course \# C14H16-PC

## 2 Credits: $\mathbf{1 2}^{\text {th }}$

Prerequisites: Students must have successfully completed a course in Health Science Education, Anatomy \& Physiology and Medical Therapeutics; must provide their own clinical uniforms and transportation to clinical site. APPLICATION REQUIRED - Class size limited to 15 students.
Patient Care Technician (PCT) is a capstone course designed to prepare students to pursue careers in healthcare, especially nursing. Upon completion of this course, a proficient student will be able to assist with the critical day-to-day care of patients. The PCT provides hands-on assistance to serve the patients' basic needs, as well as work alongside other healthcare professionals. It is vital that the Patient Care Technician has a diverse range of knowledge and skills to provide basic care. Students in this course will participate in clinical rotations. Prior to beginning work at a clinical site, students must be certified in Basic Life Support (BLS), Cardiopulmonary Resuscitation (CPR), and deemed competent in basic first aid, body mechanics, Standard Precaution guidelines, and confidentiality. At the conclusion of this course, students are eligible to take the certification examination as a Patient Care Technician (PCT).
NOTE: Admission to this class is subject to junior year application process, teacher evaluations, GPA, discipline and attendance records. Students must maintain $\mathbf{9 0 \%}$ attendance while participating in clinicals.

## THERAPEUTIC SERVICES PROGRAM OF STUDY

## HEALTH SCIENCE EDUCATION - Course \# C14H14

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Health Science Education is an introductory course designed to prepare students to pursue careers in the fields of biotechnology research, therapeutics, health informatics, diagnostics, and support services. Upon completion of this course, a proficient student will be able to identify careers in these fields, compare and contrast the features of healthcare systems, explain the legal and ethical ramifications of the healthcare setting, and begin to perform foundational healthcare skills. This course will serve as a strong foundation for all of the Health Science programs of study.

## ANATOMY AND PHYSIOLOGY - Course \# C14H09

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$

## Pre-requisite: Health Science Education

Anatomy and Physiology is an upper level course designed to develop an understanding of the structures and functions of the human body, while relating those to knowledge and skills associated with pathophysiology. Upon completion of this course, proficient students will be able to (1) apply the gross
anatomy from earlier courses to a deeper understanding of all body systems, (2) identify the organs and structures of the support and movement systems, (3) relate the structure and function of the communication, control, and integration system, and (4) demonstrate a professional, working understanding of the transportation, respiration, excretory, and reproduction systems. NOTE: The class fee for this course is $\mathbf{\$ 2 5}$.

## MEDICAL THERAPEUTICS - Course \# C14H15

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Health Science Education, and Anatomy \& Physiology
Medical Therapeutics is an applied course designed to prepare students to pursue careers in therapeutic services. Upon completion of this course, a proficient student will be able to identify careers in therapeutics services; assess, monitor, evaluate, and report patient/client health status; and identify the purpose and components of treatments.

## PHARMACOLOGICAL SCIENCES - Course \# C14H20

## 1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Anatomy and Physiology

Pharmacological Sciences is a third-level applied course in the Therapeutic Clinical Services program of study intended to prepare students with an understanding of the roles and responsibilities of the healthcare worker in a pharmacy setting. This course equips students with the communication, goalsetting, and information-processing skills to be successful in the workplace, in addition to covering key topics in pharmacology, pharmacy law and regulations, sterile and non-sterile compounding, medication safety, quality assurance, and more. Upon completion of this course, proficient students who have also completed a Clinical Internship can apply to sit for the Pharmacy Technician Certification Board examination immediately after high school graduation.

## CLINICAL INTERNSHIP - ALLIED HEALTH - Course \# C14H11-AH

 2 Credits: 12 $^{\text {th }}$Prerequisites: Students must have successfully completed a course in Medical Therapeutics, must provide their own clinical uniforms and transportation to clinical site.
APPLICATION REQUIRED - Class size limited to 15 students.
Clinical Internship is a capstone course and work-based learning experience designed to provide students with real-world application of skills and knowledge obtained in a pre-requisite Health Science course. Upon completion of this course, students will be able to sit for the Certified Clinical Medical Assistant (CCMA) Exam. Prior to beginning work at a clinical site, students must be certified in Basic Life Support (BLS) Cardiopulmonary Resuscitation (CPR), and deemed competent in basic first aid, body mechanics, Standard Precaution guidelines, and confidentiality. NOTE: Admission to this class is subject to junior year application process, teacher evaluations, GPA, discipline and attendance records. Students must maintain $\mathbf{9 0 \%}$ attendance while participating in clinicals.

[^1]such that upon completion of the course, the graduate is eligible for written examination by the State Board of Nursing. Licensed practical nurses who have passed their examination usually work under the supervision of the registered nurse or physician. Students will be required to provide their own transportation to TCAT-Dickson. Class will run from 12:30-3:30. Not offered 2024-2025.

## HEALTH SCIENCE DUAL ENROLLMENT - Course \# C14H05 <br> MEDICAL TERMINOLOGY - NSCC BIO 1000 <br> 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$ <br> Prerequisite: Health Science and A \& P

This course will cover the basic techniques for anatomical, physiological, and medical word-building. The course will teach a systematic approach to defining general medical terms and terms for pathological disorders by dividing them into word roots, combining forms, suffixes, and prefixes. A grade of "C" or above in all Surgical Technology and Central Processing curriculum courses must be earned prior to graduation. *Not a part of the Tennessee Transfer Pathway.

## HEALTH SCIENCE DUAL ENROLLMENT - Course \# C14H28 <br> BASIC ANATOMY / PHYSIOLOGY - NSCC SURG 1304 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Prerequisite: Health Science and A \& P

An introduction to human anatomy and physiology. Topics include the cell, and organ systems including integumentary, skeletal, muscular, nervous, endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive as well as disorders of these systems. A grade of "C" or above in all Surgical Technology and Central Processing curriculum courses must be earned prior to graduation. *Not a part of the Tennessee Transfer Pathway.

## HUMAN SERVICES

Student Organization-Family, Career, and Community Leaders of America FCCLA
This Career Cluster prepares individuals for employment in career pathways related to families and human needs. Based on the latest statistics, more than 7.2 million people are employed in human services occupations. Faster than average employment growth, coupled with high turnover, should create numerous employment opportunities.

Chefs
Child development specialist Community Service Worker

Consumer advocate

Dietitians Home Care Aide
Nutritionists
Social worker

## DIETETICS AND NUTRITION PROGRAM OF STUDY

## INTRODUCTION TO HUMAN STUDIES - Course \# C19H19

## 1 Credit: $9^{\text {th }}, 10^{\text {th }}$

Introduction to Human Studies is a foundational course for students interested in becoming a public advocate, social worker, dietician, nutritionist, counselor, or community volunteer. Upon completion of this course, a proficient student will have an understanding of human needs, overview of social services, career investigation, mental health, and communication. Artifacts will be created for inclusion in a portfolio, which will continue to build throughout the program of study.

# NUTRITION ACROSS THE LIFESPAN - Course \# C19H15 

## 1 Credit: $\mathbf{1 0}^{\text {th }}, 11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

## Prerequisite: Introduction to Human Studies

Nutrition Across the Lifespan is for students interested in learning more about becoming a dietitian, nutritionist, counselor, or pursing a variety of scientific, health, or culinary arts professions. Upon completion of this course, proficient students will understand human anatomy and physiological systems, nutrition requirements, as well as social, cultural, and other impacts on food preparation and integrity. Artifacts will be created for inclusion in a portfolio, which will continue to build throughout the program of study.

## NUTRITION SCIENCE AND DIET THERAPY

## Course \# C19H16

1 Credit: $11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Nutrition Across the Lifespan or Health Science Education

Nutrition Science and Diet Therapy is an applied knowledge course in nutrition for students interested in the role of nutrition in health and disease. Upon completion of this course, proficient students will be able to develop a nutrition care plan as part of the overall health care process, use methods for analyzing the nutritional health of a community, and understand the relationship of diet and nutrition to specific diseases. The course places emphasize on the role of diet as a contributor to disease and its role in the prevention and treatment of disease. Artifacts will be created for inclusion in a portfolio, which will continue to build throughout the program of study. Students will have the opportunity to take the TSIC Exam to receive an Industry Certification and college credit if scoring above a 70.

## WORK-BASED LEARNING - Dietetics \& Nutrition - Course \# C19H37

## 2 Credits: $\mathbf{1 1}^{\text {th }}, 12^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## LAW, PUBLIC SAFETY, CORRECTIONS \& SECURITY

## Student Organization - Skills USA

The Law, Public Safety and Security Cluster helps prepare students for careers in planning, managing, and providing legal, public safety, protective services and homeland security, including professional and technical support services.

Renewed national interest in public safety and security should help expand opportunities for employment in the Law, Public Safety and Security Cluster. Numerous job openings will stem from employment growth attributable to the desire for increased corporate, industrial and homeland security. Also, a more security-conscious society and concern about drug-related crimes should contribute to the increasing demand

## Bailiff <br> Corrections officer <br> Firefighter

# CRIMINAL JUSTICE AND CORRECTION SERVICES <br> PROGRAM OF STUDY 

## CRIMINAL JUSTICE I - Course \# C30H00

1 Credit: $9^{\text {th }}, 10^{\text {th }}$
Criminal Justice I is the first course in the Criminal Justice and Correction Services Program of Study. It serves as a comprehensive survey of how the law enforcement, legal, and correctional systems interact with each other in the United States. Upon completion of this course, proficient students will understand the context of local, state, and federal laws, have investigative skills pertaining to basic crime scenes and incident documentation, and understand the importance of communications and professionalism in law enforcement.

## CRIMINAL JUSTICE II - Course \# C30H01

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}$ <br> Prerequisite: Criminal Justice I

Criminal Justice II is an integrated survey of the law and justice systems for students interested in pursuing careers in law enforcement and legal services. From initial crisis scenario management to arrest, transport, trial, and corrections, procedures and laws governing the application of justice in the United States are examined in detail, with special emphasis on the best practices and professional traits required of law enforcement and legal professionals. Upon completion of this course, proficient students will be prepared for advanced work in crime scene analysis and forensic science, and have strong knowledge and skill preparation for post-secondary or career opportunities in associated fields.

## CRIMINAL JUSTICE III - Course \# C30H02

## 1 Credit: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Criminal Justice II
Students in this course will explore the basic processes and principles of forensic science as it relates to criminal investigation. Students will learn the importance of the identification, collection, and processing of evidence and of its contribution to the criminal investigation. Students will learn of the legal responsibilities and challenges which the forensic investigator may encounter from initial response to the court room.

## INTRO TO CRIMINAL JUSTICE DUAL ENROLLMENT - Course \#C30H12 <br> 1 Credit; $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite- successfully completion of Criminal Justice II and Level 2 placement in English and Reading 1 credit High School (counts as Criminal Justice III and 3 college credits

An examination of policing, corrections, and the American court system. Topics include the complexity of the criminal justice process, its lack of central coordination and, most significantly, how justice is administered in American society. This course is part of the Tennessee Transfer Pathway. This is a fall semester class.

## INTRO TO THE LEGAL PROCESS DUAL ENROLLMENT - Course C30H13 1 Credit; $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite- successfully completion of Intro to Criminal Justice 1010 1 High School credit and 3 college credits

This course reviews basic laws governing the maintenance of a democratic society and how criminal and constitutional laws meet the challenge of American society. Prerequisite(s): Level 2 placement in English and Reading. This course is part of the Tennessee Transfer Pathway. This is a spring semester class.

## WORK-BASED LEARNING - Criminal Justice - Course \# C30H27

## 2 Credits: $11^{\text {th }}, \mathbf{1 2}^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## SCIENCE, TECHNOLOGY, ENGINEERING \& MATH (STEM)

Student Organization - Technology Students of America (TSA)
A career in science, technology, engineering or mathematics is exciting, and ever-changing. Learners who pursue one of these career fields will be involved in planning, managing, and providing scientific research and professional and technical services including laboratory and testing services, and research and development services. More scientists, technologists and engineers will be needed to meet environmental regulations and to develop methods of cleaning up existing hazards. Here are just a few of the career opportunities for Science, Technology, Engineering or Math.

| Agricultural Engineer | Electrical Engineer Technician | Mechanical Engineer |
| :---: | :---: | :---: |
| Astronomer | Geologists | Nuclear Technician |
| Biologist | Hazardous Materials Technician | Physicist |
| Electrical Engineer | Industrial Engineer |  |

## TECHNOLOGY PROGRAM OF STUDY

## PRINCIPLES OF ENGINEERING AND TECHNOLOGY - Course \# C21H04

## 1 Credit: $\mathbf{9}^{\text {th }}, \mathbf{1 0}^{\text {th }}$

Principles of Engineering and Technology is a foundational course in the STEM cluster for students interested in learning more about careers in engineering and technology. This course covers basic skills required for engineering and technology fields of study. Upon completion of this course, proficient students are able to identify and explain the steps in the engineering design process. They can evaluate an existing engineering design, use fundamental sketching and engineering drawing techniques, complete simple design projects using the engineering design process, and effectively communicate design solutions to others.

## DIGITAL ELECTRONICS - Course \# C13H07

## 1 Credit: $10^{\text {th }}, 11^{\text {th }}, 12^{\text {th }}$

Prerequisite: Principles of Engineering and Technology
Digital Electronics is intended to provide students with an introduction to the basic components of digital electronic systems and equip them with the ability to use these components to design more complex digital systems. Proficient students will be able to (1) describe basic functions of digital components (including gates, flip flops, counters, and other devices upon which larger systems are designed), (2) use these devices as building blocks to design larger, more complex circuits, (3) implement these circuits using programmable devices, and (4) effectively communicate designs and systems. Students develop additional skill in technical documentation when operating and troubleshooting circuits. Upon completion of the Digital Electronics course, proficient students will be able to design a complex digital system and communicate their designs through a variety of media.

# ROBOTICS \& AUTOMATED SYSTEMS - Course \# C13H15 

## 1Credit: $11^{\text {th }}, 12^{\text {th }}$

## Prerequisite: Digital Electronics

Robotics \& Automated Systems is an applied course for students who wish to explore how robots and automated systems are used in industry. Upon completion of this course, proficient students will have an understanding of the historical and current uses of robots and automated systems; programmable circuits, interfacing both inputs and outputs; ethical standards for engineering and technology professions; and testing and maintenance of robots and automated systems. Note: Standards in this course are presented sequentially for students' learning progression; however, instructors may tailor the order of course standards to their specifications. Students are expected to use engineering notebooks to document procedures, design ideas, and other notes for all projects throughout the course.

## ENGINEERING PRACTICUM - Course \# C21H14 1 Credit: $12^{\text {th }}$ <br> Prerequisite: Robotics \& Automated Systems

Course Description -Engineering Practicum is a capstone course intended to provide students with the opportunity to apply the skills and knowledge learned in previous Engineering courses within a professional, working environment. In addition to developing an understanding of the professional and ethical issues encountered by engineers and technologists in the workplace, students learn to refine their skills in problem solving, research, communication, data analysis, teamwork, and project management. This will be a course that is a year long problem solving project using the Engineering Design Process.

## WORK-BASED LEARNING - Technology - Course \# C21H48

2 Credits: $11^{\text {th }}$, 12 $^{\text {th }}$
Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the
Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

## TRANSPORTATION, DISTRIBUTION AND LOGISTICS

## Student Organization - Skills USA

In the Transportation, Distribution and Logistics Program you will learn real-world automotive skills that can be used in many automotive or industrial settings. Here are just a few of the career opportunities for Transportation, Distribution, and Logistics.

Aircraft Mechanic<br>Bus Driver<br>Civil Engineer<br>Dredge Operator<br>Freight Agent

Locomotive Engineer<br>Ship Captain<br>Shipping Clerk<br>Transportation Inspector<br>Truck Driver

## AUTO MAINTENANCE \& LIGHT REPAIR PROGRAM OF STUDY

## MAINTENANCE AND LIGHT REPAIR I - Course \# C20H09

1 Credit: $9^{\text {th }}, 10^{\text {th }}$
The Maintenance and Light Repair I (MLR I) course prepares students for entry into Maintenance and

Light Repair II. Students explore career opportunities and requirements of a professional service technician. Content emphasizes beginning transportation service skills and workplace success skills. Students study safety, tools, equipment, shop operations, basic engine fundamentals, and basic technician skills. Upon completing all of the Maintenance and Light Repair courses, students may enter automotive service industry as an ASE Certified MLR Technician.

MAINTENANCE AND LIGHT REPAIR II - BRAKES, SUSPENSION \& STEERING Course \# C20H10 2 Credits: $10^{\text {th }}, 11^{\text {th }}$<br>Prerequisite: Maintenance and Light Repair I

The Maintenance and Light Repair II (MLR II) Students study and service suspension and steering systems and brake systems. Students also study and service automotive HVAC systems, engine performance systems, automatic and manual transmission/transaxle systems, and practice workplace soft skills. Upon completing all of the Maintenance and Light Repair courses, students may enter automotive service industry as an ASE Certified MLR Technician. Upon completion of all MLR courses students will be able to take the tests for the ASE MLR Certifications.

## MAINTENANCE AND LIGHT REPAIR II DUAL ENROLLMENT TCAT - Course \# C20H21 2 Credits: $10^{\text {th }}, 11^{\text {th }}$ <br> Prerequisite: Maintenance and Light Repair I

The Maintenance and Light Repair II DE Students study and service suspension and steering systems and brake systems. Students also study and service automotive HVAC systems, engine performance systems, automatic and manual transmission/transaxle systems, and practice workplace soft skills. Upon completing all of the Maintenance and Light Repair courses, students may enter automotive service industry as an ASE Certified MLR Technician. Upon completion of all MLR courses students will be able to take the tests for the ASE MLR Certifications.

## MAINTENANCE AND LIGHT REPAIR III - ELECTRICAL - Course \# C20H11 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Maintenance and Light Repair II

Students study automotive general electrical systems, starting and charging systems, batteries, lighting, and electrical accessories. Upon completing all of the Maintenance and Light Repair courses, students may enter automotive service industry as an ASE Certified MLR Technician.

## MAINTENANCE AND LIGHT REPAIR III DUAL ENROLLMENT - Course \# C20H22 1 Credit: $11^{\text {th }}, 12^{\text {th }}$ <br> Prerequisite: Maintenance and Light Repair DE II

Students study automotive general electrical systems, starting and charging systems, batteries, lighting, and electrical accessories. Upon completing all of the Maintenance and Light Repair courses, students may enter automotive service industry as an ASE Certified MLR Technician.

## WORK-BASED LEARNING - Maintenance \& Light Repair - Course \# C20H34 <br> 2 Credits: $\mathbf{1 1}^{\text {th }}$, 12 $^{\text {th }}$

Prerequisite: Must have at least 3 credits in the program area and meet the selection criteria as stated on the Work-Based Learning application. Applications available in the Sophomore and Junior Google Classrooms. Work-Based Learning: Career Practicum is a capstone course intended to provide students with opportunities to apply the skills and knowledge learned in previous CTE and general education courses within a professional work environment. The course allows students to earn high school credit for select models of work-based learning, which allow students to interact with industry professionals in order to extend and deepen classroom work and support the development of post-secondary and career readiness knowledge and skills.

HEATING, VENTILATION, AIR CONDITIONING/ REFRIGERATION - Course \# C17H03<br>3 credits: $\mathbf{1 1}^{\text {th }}, \mathbf{1 2}^{\text {th }}$<br>Students must have a 2.0 or higher GPA.

Classroom and shop learning experiences include theory, application, and service of air conditioning and refrigeration equipment. Included are print reading, basic electronics, pneumatics, math, programmable controllers, refrigerant containment certification (EPA certification), and heat pump technology. Upon completion, students are prepared to enter jobs as service technicians in a variety of domestic, industrial, and commercial settings. Students will be required to provide their own transportation to TCATDickson. Class will run from 2:30-5:30. Students will be allowed to start school later and end early to equalize time. Students should be able to achieve 350+ hours / year. Estimated length: 20 months

| Program Credentials | $\underline{\text { Hours }}$ |  |
| :--- | :---: | :---: |
| $\underline{\text { HVAC Mechanic Helper }}$ | $\underline{432}$ |  |
| $\underline{\text { Certificatential }}$ |  |  |
| Domestic Unit Repair | $\underline{864}$ |  |
| HVAC Technician | $\underline{\text { Certificate }}$ |  |
| $\underline{\text { HVAC / Refrigeration Technician }}$ | $\underline{1728}$ |  |

## Tennessee College of Applied Technology - Dickson

This is considered Dual Enrollment and will cover 3 periods of each day. www.tcatdickson.edu Prerequisite: At least a C grade point average and less than 50 discipline points and approved attendance record. You will be interviewed prior to final selection for TCAT classes. Students must have a 2.0 or higher GPA.
NOTE: Please contact your counselor during registration period for more information. These courses are for Seniors (12th grade) pending available seats at TCAT Dickson. Must provide own transportation and books, unless provided by district. Supply and equipment fees required. Must take both terms. Students should only enroll in these courses based on career choice. Students need to demonstrate particular interest with desire to continue training at TCAT after graduation.

## DIESEL POWERED EQUIPMENT - Course \# C20H01DT 3 Credits; $\mathbf{1 2}^{\text {th }}$ <br> Students must have a 2.0 or higher GPA.

The Diesel Powered Equipment Technology program provides practical experience in the repair and maintenance of diesel powered equipment. Students receive instruction in troubleshooting, engine analysis, disassembling engines replacing defective parts, reassembling, etc. The program mission is to provide technical instruction and skill development to enable students to enter employment in truck, construction, agricultural equipment, and other related fields as technicians.

## MECHATRONICS - Course \# C13H04 3 Credits; $\mathbf{1 2}^{\text {th }}$ <br> Students must have a 2.0 or higher GPA.

The Mechatronics technician ensures all components of a manufacturing operation that includes mechanics, electronics, control engineering and computing are all working properly. Mechatronics may alternately be called electromechanical systems or control and automation engineering/ technician. Because Mechatronics combines training in two existing fields - Industrial Maintenance and Machine

Tool Technology - the multi-craft technician must know how to repair and troubleshoot a variety of systems. Students earning the Mechatronics diploma will be trained extensively in manufacturing processes with emphasis on accuracy and productivity, utilizing skills in pneumatics, hydraulics, robotics, computer controls and preventive maintenance. Graduates should be well-rounded, multi-craft technicians with the skills required to enter an on-the-job apprentice program.

## MACHINE TOOL TECHNOLOGY - Course \# C13H01 3 Credits; 12 ${ }^{\text {th }}$ <br> Students must have a 2.0 or higher GPA.

Processes are completed on machines such as milling machines, lathes, grinders, drill presses, CNC milling machines \& EDM machines. Instruction is given in blueprint reading, mathematics, precision measuring, and such basic metallurgy as properties of metals, their workable characteristics, best treatment of metals, and relative hardness.

## INDUSTRIAL MAINTENANCE - Course \# C13H30

## 3 Credits; $\mathbf{1 2}^{\text {th }}$

Students must have a 2.0 or higher GPA.
Instruction includes industrial economics, air conditioning, pneumatics, programmable controllers, hydraulics, robotics, welding, machine shop, and related math. This program prepares students to maintain automated equipment and perform industrial maintenance repairs.

## WELDING I \& II DE - C13H03

## 3 Credit; $\mathbf{1 2}^{\text {th }}$

Students must have a 2.0 or higher GPA.
Welding students will learn various basic and advanced welding/pipefitting techniques that are common in the industries: Shielded Metal, Gas Metal, Gas Tungsten and Flux Cored Arc Welding, cutting techniques, grinding, metal preparation, symbols and blueprint reading, metallurgy, layout, fabrication, pipe/valves/fitting installation, power tools, and measurement techniques. The Welding Technology program is aligned with the National Center for Construction Education and Research (NCCER) curricula. This curriculum has been developed with the American Welding Society (AWS), Construction Industry Institute, the Manufacturer's Institute and the Associated General Contractors of America.

## TCAT/DUAL ENROLLMENT PRE-NURSING - Course \# C14H03 3 Credits; $\mathbf{1 2}^{\text {th }}$ <br> Students must have a 2.0 or higher GPA.

Completion of this 3 hour course leads directly to enrollment in TCAT Practical Nursing Program upon graduation. Students will complete 2 semesters of TCAT courses during this course and will enroll in 2 semesters after High School graduation to complete TCAT Practical Nursing Licensing Program. Students study basic nursing skills and related subjects such as body structure and function, nutrition, pharmacology, obstetrics, and psychology. Clinical experience provides supervised nursing care of medical, surgical, obstetric, and pediatric patients. Both classroom work and clinical experiences are such that upon completion of the course, the graduate is eligible for written examination by the State Board of Nursing. Licensed practical nurses who have passed their examination usually work under the supervision of the registered nurse or physician. Students will be required to provide their own transportation to TCAT-Dickson. Class will run from 12:30-3:30
